

Package ‘PhyloProfileData’

October 16, 2021

Type Package

Version 1.6.1

Date 2021-06-29

Title Data package for phylogenetic profile analysis using
PhyloProfile tool

Description Two experimental datasets to illustrate running and analysing phylogenetic profiles with PhyloProfile package.

PhyloProfileData	<i>Data package for phylogenetic profile analysis using PhyloProfile tool</i>
------------------	---

Description

The PhyloProfileData package provides a collection of datasets to accompany the R package PhyloProfile, where they are used to illustrate how to run PhyloProfile and analyse its results. Briefly, it contains the phylogenetic profiles, the fasta sequences and the domain annotations for two experimental data sets, including human AMPK-TOR pathway proteins and BUSCO Arthropoda proteins.

Details

More details of the datas can be found in the vignette "PhyloProfileData" using `browseVignettes("PhyloProfileData")`.
