[20551] "Encodes Chromogranin B, a tyrosine-sulfated secretory protein found in a wide variety of tissues"

[20552] "The action of synthesizing a DNA product from a viral RNA template by a viral polymerase"

[20553] "This protein is known to interact with cellular and viral survival-promoting proteins"

[20554] NA

[20555] "The protein encoded by this gene is a member of the chromogranin/secretogranin family"

[20556] "Hrk is a protein promoting cell death by apoptosis. Hrk physically interacts with BCL2"

[20557] "Encoded by human PHB Gene (Prohibitin Family), evolutionarily conserved ubiquitous protein"

[20558] "Encoded by human BARD1 Gene, nuclear BARD-1 Protein contains a RING zinc finger domain"

[20559] "Encoded by human RAD51C Gene (RECA Family, RAD51 Subfamily), the 376-amino acid protein"

[20560] "Proteins present within the ribosomal subunits. In eukaryotes there are 50 proteins in the 60S subunit"

[20561] "Encoded by human RPL13 Gene (L13E Ribosomal Protein Family), highly conserved protein"

[20562] "Encoded by Ribonucleotide Reductase Subunit Genes (RRM1 and RRM2), the M1 Chain of Ribonucleotide Reductase"

[20563] "Encoded by human RRM1 Gene, Ribonucleoside-Diphosphate Reductase M1 Chain is 100 kD protein"

[20564] NA

[20565] "Encoded by human S100A2 Gene, 97-amino acid 11 kD S-100L Protein is a member of the S100 family"

[20566] NA

[20567] NA

[20568] "Encoded by human SNCG Gene (Synuclein Family), the highly conserved 127-amino acid protein is expressed in the brain and is associated with Parkinson's disease."

[20569] "Encoded by human STIM1 Gene, ubiquitously expressed 685-amino acid 77.5 kD (precursor) protein is expressed in the brain and is associated with Parkinson's disease."

[20570] "The PIK3CA gene encodes Phosphoinositide-3-Kinase, Catalytic, Alpha Polypeptide, which is required for the phosphorylation of Akt and other substrates."

[20571] "The DCK gene encodes Deoxycytidine Kinase, which is required for the phosphorylation of dCTP to dCTP-diphosphate for DNA synthesis."

[20572] "Human MAP2K1 Gene (DSPK/MAP2K Family) encodes 392-aa 43-kDa MAP2K1 Protein, a member of the MAPK family."

[20573] "Human RIPK1 Gene at 17q23-q24 encodes 74-kDa Receptor-Interacting Serine/Threonine Kinase, which is involved in the regulation of cell death and inflammation."

[20574] "Detached cell proliferation. (NCI)"

[20575] "Encoded by human TACC1 Gene (TACC Family), TACC1 Protein is expressed during embryonic development and is involved in chromosome segregation."

[20576] "Human MAPK3 Gene (MAPK Family) encodes MAP Kinase 3 (p44MAPK, ERK1), a Ser/Thr Kinase, which is involved in the regulation of cell growth and differentiation."

[20577] "Human MAPK1 Gene (MAPK Family) encodes alternative p40 and p41 isoforms of Mitogen-Activated Protein Kinase, which is involved in the regulation of cell growth and differentiation."

[20578] "Human MAPK8 Gene (MAPK Family) encodes alternative isoforms (alpha-1, -2, beta) of Mitogen-Activated Protein Kinase, which is involved in the regulation of cell growth and differentiation."

[20579] "The 7-exon 30-kb human TYMS Gene (Thymidylate Synthase Family) encodes 312-amino acid protein, which is involved in the regulation of cell growth and differentiation."

[20580] NA

[20581] "These proteins are encoded by members of the trefoil family genes. They are characterized by a conserved trefoil domain and are involved in the regulation of cell growth and differentiation."

[20582] "Human MGMT Gene (MGMT Family) encodes 207-aa 22-kDa O-6-Methylguanine-DNA Methyltransferase, which is involved in the regulation of cell growth and differentiation."

[20583] "Important for genomic stability and cell cycle regulation, human TSG101 Gene encodes 205-aa 22-kDa protein, which is involved in the regulation of cell growth and differentiation."

[20584] "Human CKB Gene (ATP:Guanido Phosphotransferase Family) encodes 381-aa 43-kDa protein, which is involved in the regulation of cell growth and differentiation."

[20585] "Human TNKS Gene (PARP Family) encodes 2 alternative isoforms of ADP-ribosyltransferase, which is involved in the regulation of cell growth and differentiation."

[20586] "Expressed in melanocytes, 7-exon 24-kb human TYRP1 Gene (Tyrosinase Family) encodes 205-aa 22-kDa protein, which is involved in the regulation of cell growth and differentiation."

[20587] "Encoded by human TSG101 Gene and expressed in heart, brain, placenta, lung, liver, and kidney, 205-aa 22-kDa protein, which is involved in the regulation of cell growth and differentiation."

[20588] "The 26S proteasome is a multicatalytic proteinase complex with a highly ordered structure and is involved in the regulation of cell growth and differentiation."

[20589] NA

[20590] NA

[20591] NA

[20592] NA

[20593] NA

[20594] "Encoded by human TSSC1 Gene, 387-amino acid 44 kD Tumor Suppressing Subtransferrin Receptor, which is involved in the regulation of cell growth and differentiation."

[20595] "Encoded by human TSSC3 Gene, 152-amino acid 17 kD TSSC3 Protein is expressed in the brain and is involved in the regulation of cell growth and differentiation."

[20596] "Encoded by human WNT3 Gene (WNT Family), 355-amino acid 39.6 kD (precursor) Wnt3 protein is involved in the regulation of cell growth and differentiation."

[20597] "Human HPR Gene (Peptidase S1 Family) at 16q22.1 encodes Haptoglobin-Related Protein, which is involved in the regulation of cell growth and differentiation."

[20598] "Encoded by human WNT10B Gene (WNT Family), 389-amino acid 43 kD (precursor) Wnt10b protein is involved in the regulation of cell growth and differentiation."

[20599] "Expressed in CNS oligodendrocytes by human RTN4 Gene (Reticulon Family), Reticulon 4 protein is involved in the regulation of cell growth and differentiation."

[20600] "Encoded by human ZNF147 Gene (TRIM Family, RING Finger Family), the ubiquitous protein is involved in the regulation of cell growth and differentiation."

[20601] "This gene encodes a protein that associates with the centromere-kinetochore complex and is involved in the regulation of cell growth and differentiation."

[20602] "Encoded by human ABCG2 Gene and highly expressed in the placenta, the 655-amino acid protein is involved in the regulation of cell growth and differentiation."

[20603] NA

[20604] "Genes belonging to this family are implicated in several inherited human diseases, including deafness and mental retardation."

[20605] "The 14-3-3 family of proteins mediates signal transduction by binding to phosphorylated proteins and is involved in the regulation of cell growth and differentiation."

[20606] "Inactivation of tumor suppressor BCDS2 Protein, encoded by Breast Cancer, Ductal Carcinoma 2 Gene, is involved in the regulation of cell growth and differentiation."

[20607] "Expressed from multiple promoters in neural and neuroendocrine tissues as 3.4-kDa protein, which is involved in the regulation of cell growth and differentiation."

[20608] "Three different proteins encoded by the RTN1 gene. They are identical at their N-termini but differ in their C-terminal regions and are involved in the regulation of cell growth and differentiation."

[23762] "The GADD45A gene at 1p31.2-p31.1 encodes Growth Arrest and DNA-Damage-Inducibl

[23763] "Human GALR2 Gene at 17q25.3 encodes 387-aa 42-kDa Galanin Receptor 2, a GPCR f

[23764] "The human GAS41 gene at 12q13-q15 encodes Glioma-Amplified Sequence-41, which

[23765] "The protein encoded by this gene is actually a preproprotein that is cleaved i

[23766] "The protein encoded by this gene is a member of the bone morphogenetic protein

[23767] "The human GDF5 gene at 20q11.2 encodes Growth Differentiation Factor 5, which

[23768] "The human GDF8 gene at 2q32.2 encodes Growth Differentiation Factor 8, which i

[23769] "The human GDF9 gene at 5q31.1 encodes Growth Differentiation Factor 9, which i

[23770] "The human GFI1B gene at 9q34.13 encodes Growth Factor Independence-1B, which i

[23771] "The human GFRA2 gene at 8p21 encodes GDNF Family Receptor Alpha 2, which is a

[23772] "This gene encodes gastric inhibitory polypeptide (glucose-dependent insulinotr

[23773] "This gene encodes G Protein-Coupled Receptor Kinase-Interactor 1: GIT1 is a mu

[23774] "This gene encodes a member of the GIT protein family. GIT proteins interact wi

[23775] "Human GLI1 Gene (GLI/Kr family) at 12q13.2-q13.3 is homologous to Ci (Drosophi

[23776] "The human GLTSCR1 gene at 19q13.3 encodes Glioma Tumor Suppressor Candidate Re

[23777] "The human GLTSCR2 gene at 19q13.3 encodes Glioma Tumor Suppressor Candidate Re

[23778] "G-protein alpha subunit 12; couples to thrombin and thromboxane A2 receptors i

[23779] "Single copy human GNAI2 Gene (G-Alpha 1 Family) encodes 354-aa 40-kDa G(i) Alp

[23780] "Guanine nucleotide binding protein is a member of a G protein subfamily that m

[23781] "Heterotrimeric guanine nucleotide-binding proteins (G proteins), which integra

[23782] "With an upstream CCG repeat length polymorphism and expressed in oocytes and b

[23783] "Human GNB3 Gene at 12p13 encodes 340-aa 37-kDa Guanine Nucleotide Binding Prot

[23784] "The glycoprotein encoded by this gene is a cell surface antigen that is expres

[23785] "Expressed in brain, human GPR17 Gene (GPCR1 Family) at 2q21 encodes in 2.3-/6.

[23786] "The GPR2 gene encodes G Protein-Coupled Receptor 2, which is the receptor for

[23787] "Human GPR32 Gene (GPCR1 Family) at 19q13.3 encodes 356-aa 40-kDa integral memb

[23788] "Expressed as a 3-kb transcript in spleen, testis, peripheral leukocytes, brain

[23789] "Encodes CD183, a G protein-coupled receptor with selectivity for three chemoki

[23790] "Expressed in stomach, kidney, liver, lung, pancreas, central nervous system, a

[23791] "Expressed primarily in testis and brain, 16-exon 75-kb human GPRK2L Gene (GPRK

[23792] "Expressed in heart, placenta, lung, skeletal muscle, brain, liver, pancreas, a

[23793] "The GPRK6 gene encodes G Protein-Coupled Receptor Kinase 6, which belongs to t

[23794] "Expressed in retina, 4-exon 10-kb human GPRK7 Gene (GPRK family) at 3q23 encod

[23795] "Human GPS1 Gene at 17q25.3 encodes 471-aa 53-kDa G Protein Pathway Suppressor

[23796] "Human GPS2 Gene at 17p13 encodes 2 isoforms of 327-aa 37-kDa G Protein Pathway

[23797] "Normally expressed in early fetal development, human GR6 Gene at 3q21 in the l

[23798] "This gene encodes a member of the GRB2/Sem5/Drk family. This member functions

[23799] "This gene encodes growth factor receptor-bound protein 10. This gene product i

[23800] "Member of the GRB7 family of adapter proteins; identified as a partner of the

[23801] "GRB2 is the homolog of the Sem5 gene of *C. elegans* and the Drk gene of *Drosoph*

[23802] "This gene encodes growth factor receptor-bound protein 7. It is an adapter-type
[23803] "GRF2 is a human guanine nucleotide releasing protein for Ras protein. (from Lo
[23804] "This gene encodes subunit 3 of the AMPA subtype of ionotropic glutamate receptor
[23805] "This gene encodes metabotropic 1 of glutamate Receptor. The metabotropic glutamate
[23806] "The metabotropic glutamate receptors are a family of G protein-coupled neurotransmitter
[23807] "This gene encodes metabotropic 6 of glutamate Receptor. The metabotropic glutamate
[23808] "This gene encodes glutathione S-transferase theta 1, a member of a superfamily
[23809] "The protein encoded by this gene belongs to the class II histone deacetylase/acid
[23810] "Human Hepatocyte Growth Factor is also known as Scatter Factor and Hepatopoietin
[23811] "HGS encodes hepatocyte growth factor-regulated tyrosine kinase substrate that
[23812] "The 1.4-kb human HHCM Gene at 8q24.3 encodes 467-amino acid 52-kD Hepatocellular
[23813] "Expressed in heart, skeletal muscle, and adipose tissue, 58-kb insulin-responsive
[23814] "Expressing a 2-kb transcript in adipose tissue, neutrophils, and peripheral blood
[23815] "Tightly linked to MEN2, the 3-kb human HNRPA3 Gene at 10q11.1 encodes Heterogeneous
[23816] "Human HOXA10 Gene (ABD-B Family) at 7p15-p14.2 resides within the 90-kb HOXA cluster
[23817] "Human HOXA9 Gene (ABD-B Family) at 7p15-p14.2 resides within the 90-kb HOXA cluster
[23818] "The 14-kb human HOXC6 Gene (ANTP Family) at 12q13.3 resides within the HOXC cluster
[23819] "The 8.7-kb human HPCA Gene (Recoverin Subfamily) at 1p35-p34.2 expresses a single
[23820] "The single copy 43-kb human HPSE Gene at 4q21.3 contains twelve exons expressed
[23821] "Expressed in breast, ovaries, pregnant uterus, placenta, testis, thymus, prostate
[23822] "The 20-kb human tumor suppressor HTATIP2 Gene (SDR Family) at 11p15.1 generates
[23823] "Controlled by IFN-alpha and -gamma, the two-exon human IFITM1 Gene (IFN-Induced
[23824] "Situated in a cluster of interferon-alpha and -omega genes and expressed by macrophages
[23825] "Situated in a cluster of interferon-alpha and -omega genes and expressed by macrophages
[23826] "Situated in a cluster of interferon-alpha and -omega genes, the 1.5 kb human IFITM1
[23827] "Ubiquitously expressed as a 1.4-kb mRNA (highest in heart, skeletal muscle, and
[23828] "Encodes Insulin-like growth factor I (somatomedin C); activates cell proliferation
[23829] "Insulin-like growth factors I and II, also known as somatomedin C and somatomedin
[23830] "Encodes IGF2R, a 250kDa transmembrane protein. It was originally identified as
[23831] "The insulin-like growth factors, their receptors, and their binding proteins p
[23832] "The insulin-like growth factors, their receptors, and their binding proteins p
[23833] "The insulin-like growth factors, their receptors, and their binding proteins p
[23834] "The insulin-like growth factors, their receptors, and their binding proteins p
[23835] "The protein encoded by this gene belongs to the cytokine receptor family. It is
[23836] "This gene encodes the alpha subunit of the high-affinity receptor for interleukin-12
[23837] "IL12A (p35) comprises one chain of the heterodimeric IL12. Interleukin-12 is a
[23838] "IL12B (p40) comprises one chain of the heterodimeric IL12. Interleukin-12 is a
[23839] "The IL13 gene at 5q31 encodes Interleukin-13, which is an immunoregulatory cytokine
[23840] "Expressed by activated T cells, human IL17C Gene (IL-17 Family) at 16q24 encodes
[23841] "The IL2 gene at 4q26-q27 encodes Interleukin-2, which is a secreted cytokine that
[23842] "The protein encoded by this gene represents the beta subunit of the interleukin-2
[23843] "This gene encodes interleukin 2 receptor gamma chain (IL2RG), which is an important

[23844] "IL4R when complexed with the common gamma chain (IL2RG) serves as the high-aff

[23845] "The IL5 Gene at 5q31.1 encodes Interleukin-5, which is a cytokine that acts as

[23846] "The protein encoded by this gene is an interleukin 5 specific subunit of a het

[23847] "The IL6 Gene at 7p21 encodes Interleukin-6, which is a cytokine with a wide va

[23848] "Widely expressed (not restricted to IL6 responsive cells) human IL6ST Gene (Ty

[23849] "The protein encoded by this gene is a receptor for interleukine 7 (IL7). The f

[23850] "The protein encoded by this gene is a member of the CXC chemokine family. This

[23851] "Interleukin-8 is a member of a family of pro-inflammatory cytokines. The best-

[23852] "Interleukin-8 is a member of a family of pro-inflammatory cytokines. The best-

[23853] "ILK encodes a predicted 451-amino acid protein, with an apparent molecular wei

[23854] "The protein product of the ING1 gene physically interacts with p53 and appears

[23855] "This gene encodes inhibin alpha subunit that can joins either the beta A or be

[23914] "Activated by UV and osmotic shock, the 128.6-kb human MAP2K6 Gene (MAP2K Famil

[23915] "The 78-kb human MAP3K1 Gene (MAP3K Family) at 5q11.2 encodes a Ser/Thr MEKK1 F

[23916] "Expressed as a single 5-kb transcript from 15 exons in small intestine, spleen

[23917] "With a TATA-less and CpG island promoter, 71.6-kb 17-exon human MAP3K7 Gene (M

[23918] "The 37-kb human MAP3K7IP1 Gene at 22q13.1 generates a ubiquitous 3.5-kb mRNA t

[23919] "The ubiquitously expressed 195-kb human MAP4K4 Gene (SER/THR Family, STE20 Sub

[23920] "The protein encoded by this gene is a member of the MAP kinase family. MAP kin

[23921] "MAPK11 Gene encodes MAP Kinase 11, a member of the MAP kinase family of integr

[23922] "Activation of members of the mitogen-activated protein kinase family is a majo

[23923] "The protein encoded by this gene is a member of the MAP kinase family. MAP kin

[23924] "Expressed in brain, heart, placenta, pancreas, skeletal muscle, lung, liver, a

[23925] "Highly expressed in heart and brain, human MAPK4 Gene (MAPK Family) encodes 55

[23926] "Expressed in skeletal muscle, brain, heart, placenta, lung, liver, pancreas, k

[23927] "Highly expressed as four alternative transcripts in heart, placenta, lung, kid

[23928] "Expressed as alpha-1, -2, beta-1, -2 isoforms, human MAPK9 Gene (MAPK Family)
[23929] "Human MAPRE1 Gene (MAPRE/RP/EB Family) encodes 268-aa 30-kDa Microtubule-Associated
[23930] "This gene encodes a protein that has amino acid sequence similarity to Csk tyrosine kinase
[23931] "Human MCT-1 Gene encodes MCT-1 Protein, of unknown function. (NCI)"
[23932] "This gene encodes neurite outgrowth-promoting factor 2, a 143-residue protein
[23933] "Expressed in immunohepatopoietic tissues and in brain, human MEIS1 Gene (TALE/MEIS)
[23934] "Expressed in monocytes, bone marrow, and tissues of epithelial and reproductive
[23935] "Expressed by mammary epithelia and activated macrophages, human MFGE8 Gene encodes
[23936] "Ubiquitously expressed as a 6.6-kb transcript, human MFHAS1 Gene encodes 1,052-aa
[23937] "This gene is a member of the fringe gene family which also includes Radicalfringe
[23938] "Upregulated by vitamin D in bone cells and expressed at high levels in heart, brain,
[23939] "This gene encodes a lymphokine involved in cell-mediated immunity, immunoregulatory
[23940] "Induced by INF gamma and oriented head-to-tail and separated by less than 16-kb
[23941] "Widely expressed (3-kb mRNA), human MKNK1 Gene (Ser/Thr Kinase Family) encodes
[23942] "Human MKPX Gene encodes 184-aa 21-kDa Dual Specificity Phosphatase 22. While M
[23943] "Expressed (18-kb mRNA) in most adult tissues, including hematopoietic cells, e
[23944] "Human MLLT1 Gene encodes 559-aa 62-kDa nuclear ENL Protein, a protein similar
[23945] "Widely expressed as a single transcript of nearly 10-kb, human MLLT2 Gene (AF4)
[23946] "Human MLLT3 Gene, more than 100-kb, encodes 568-aa 63-kDa AF-9 Protein, putati
[23947] "Expressed in a variety of cell types, human MLLT4 Gene encodes 1816-aa 206-kDa
[23948] "Human MLLT6 Gene encodes 1093-aa 112-kDa AF-17 Protein, high similarity to AF1
[23949] "Expressed in heart, brain, placenta, lung, liver, skeletal muscle, kidney, and
[23950] "Expressed in a variety of tissues, but abundant in the kidney proximal tubule
[23951] "Proteins of the matrix metalloproteinase (MMP) family are involved in the brea
[23952] "Expressed (2-kb mRNA) in a variety of tissues (abundantly in erythroid stem ce
[23953] "Human MPP2 Gene (MAGUK Family) encodes 576-aa 65-kDa Palmitoylated Membrane Pr
[23954] "Human MPP3 Gene (MAGUK Family) encodes 585-aa 66-kDa Palmitoylated Membrane Pr
[23955] "Expressed (4-, 3.8-, and 1.3-kb mRNAs) in all tissues tested (highest in heart
[23956] "Induced by IL9, but not IL2 or IL4, in brain and heart only, human MRAS Gene (R
[23957] "This gene is similar to a mouse putative tumor suppressor gene that is frequen
[23958] "The gene encodes musculin that contains a transcriptional repression domain an
[23959] "This gene encodes a receptor of the MET receptor family. The protein is membra
[23960] "Expressed in many tissues as isoforms short Type A (high in skeletal muscle) c
[23961] "Called MuSK for muscle-specific kinase. It is a receptor-like tyrosine kinase
[23962] "Expression of the c-myc gene, which produces an oncogenic transcription factor
[23963] "Widely expressed as a 4.5-kb transcript, human MYBBP1A Gene encodes 1328-aa 14
[23964] "Expressed in most nonlymphoid tissues including prostate, lung, liver, and col
[23965] "Expressed in adult and fetal tissues, 52-exon 420-kb human NAG Gene encodes 13
[23966] "Human NCK2 Gene encodes ubiquitous 380-aa 43-kDa cytoplasmic NCK Adaptor Prote
[23967] "Expressed in fetal brain, lung, liver, and kidney, human NCYM Gene encodes 109
[23968] "Expressed most prominently in placenta, prostate, kidney, small intestine, and
[23969] "Homolog of the chicken gene neogenin, which is induced in neural cells immedia

[23970] "Expressed as a 4.2-kb mRNA in brain, human NEURL Gene encodes 574-aa 62-kDa Ne

[23971] "This gene encodes nerve growth factor receptor (NGFR). NGFR was the first memb

[23972] "Cloned by its ability to interact with the death domain of nerve growth factor

[23973] "Expressed as a 1.6-kb mRNA in fetal liver and located about 80-kb upstream of

[23974] "Expressed in a largely prostate-specific and androgen-regulated manner, human

[23975] "Expressed in melanocytes, kidney, placenta, spleen, liver, prostate, and gut,

[23976] "A mammalian homolog of amphibian bombesin, Neuromedin B receptor binds neurome

[23977] "NMYC interactor (NMI) encodes a protein that interacts with NMYC and CMYC (two

[23978] "Expressed throughout the enteric and central nervous systems, human NMU Gene (

[23979] "Expressed in adult/fetal tissues, human NOTCH1 Gene (Notch Family) encodes 255

[23980] "Expressed by heart and vasculature, human NPR2 Gene (Guanylyl Cyclase Family)

[23981] "Broadly expressed as 3.0-kb and 6.0-kb transcripts, human NR1 Gene (FNR Family)

[23982] "Expressed as a 2.4-kb transcript, human NRBP Gene encodes ubiquitous 535-aa 60

[23983] "The cell adhesion molecules (CAMs) are a subset of the immunoglobulin (Ig) super

[23984] "Neuregulin 2 (NRG2) is a novel member of the neuregulin family of growth and d

[23985] "Human NRP1 Gene (Neuropilin Family) encodes Neuropilin 1, containing 1 MAM, 2

[23986] "This gene encodes neurturin, a member of the TGF-beta subfamily. This gene sig

[23987] "This gene is a member of a family of neurotrophic factors, neurotrophins, that

[23988] "Widely expressed in adult tissues (highest in heart, small intestine, colon, l

[23989] "Widely expressed (mainly neural tissue), human NTRK2 Gene (IR Tyr Kinase Famil

[23990] "Widely expressed (mainly nervous tissue), human NTRK3 Gene (IR Tyr Kinase Fami

[23991] "This gene encodes a structural component of the nucleus; predicted role in nuc

[23992] "Expressed in thymus, spleen, bone marrow, kidney, brain, and testis, human NUP

[23993] "Human OR1G1 Gene (GPCR1 Family) encodes 313-aa 35-kDa integral membrane protei

[23994] "Ubiquitously expressed (highest in pancreas, lowest in liver) human OS4 Gene (

[23995] "Human OSMR Gene encodes 111-kDa 979-aa Oncostatin-M Specific Receptor Beta Sub

[23996] "Human P37NB Gene encodes 313-aa 37-kDa Leucine Rich Repeat Containing Protein

[23997] "Human PAG Gene encodes ubiquitous 432-aa 47-kDa Phosphoprotein Associated with

[23998] "This gene encodes a protein that shares a high degree of sequence similarity w

[23999] "The PARD6A gene encodes Tax Interaction Protein 40, which belongs to the PAR6

[24000] "The tumor suppressor WT1 represses and activates transcription. Apoptosis resp

[24001] "The PAX3 gene encodes Paired Box Protein Pax-3, which is a member of the paire

[24002] "The PAX5 gene encodes Paired Box 5, a member of the paired box (PAX) family of

[24003] "The PAX7 gene encodes Paired Box Protein Pax-7, which is a member of the paire

[24004] "The PBEF gene encodes Pre-B-Cell Colony-Enhancing Factor, a cytokine that acts

[24005] "The PBX3 gene encodes Pre-B-Cell Leukemia Transcription Factor 3. This protein

[24006] "The PCK1 gene encodes PCKAIRE Protein Kinase 1, which belongs to the cdc2/cdk

[24007] "The PDC gene encodes Phosducin, a phosphoprotein that is located in the outer

[24008] "Expressed as 2 alternative isoforms in platelets, human PDGFA Gene (PDGF/VEGF

[24009] "The PDGFRA gene encodes Platelet-Derived Growth Factor Receptor, Alpha Polypep

[24010] "The PDGFRB gene encodes Platelet-Derived Growth Factor Receptor, Beta Polypept

[24011] "The PDGFRL gene encodes Platelet-Derived Growth Factor Receptor-Like Protein,

[24012] "The PDPK1 gene encodes 3-Phosphoinositide Dependent Protein Kinase-1, which be

[24013] "The PGF gene at 14q24-q31 encodes Placental Growth Factor, which belongs to th

[24014] "Widely expressed, human PIAS3 Gene encodes 619-aa 67-kDa Protein Inhibitor of

[24015] "The PIK3CB gene encodes Phosphoinositide-3-Kinase, Catalytic, Beta Polypeptide

[24016] "The PIK3CG gene encodes Phosphoinositide-3-Kinase, Catalytic, Gamma Polypeptid

[24017] "The PIK3CG gene encodes Phosphoinositide-3-Kinase, Regulatory Subunit, Polypep

[24018] "The PIK4CB gene encodes Phosphoinositide-4-Kinase, Catalytic, Beta Polypeptide

[24019] "Expressed ubiquitously (high in brain), human PIP5K2A Gene (PtdIns(4)P-5-Kinas

[24020] "The protein encoded by this gene catalyzes the phosphorylation of phosphatidyl

[24021] "Expressed in many cells, human PLA2G2A Gene (PLA2 Type II Family) encodes en

[24022] "Expressed (1.35-kb mRNA) in activated, but not resting, macrophages and in pla

[24023] "About 60-kb downstream of NV149 and widely expressed (only from paternal allel

[24024] "High affinity cellular receptor for urokinase plasminogen activator (uPA). PL

[24025] "Expressed in many tissues (4.4-kb mRNA), 31-exon 17-kb human PLCB3 Gene encode

[24026] "Induced by growth-stimulating agents in placenta and colon, human PLK Gene (CD

[24027] "Widely expressed as 6- and 7-kb transcripts at varying levels (highest in Sert

[24028] "Rapidly induced (2.0-kb mRNA) by PMA, p53-responsive immediate-early-response

[24029] "Expressed in a cell-cycle related manner, human PML Gene (TRIM Family) encodes

[24030] "Expressed (2.6-kb transcript) in a variety of tissues (fetal liver and adult p

[24031] "Expressed ubiquitously (1.74-kb transcript), human PPAP2A Gene (PAP Family) en

[24032] "The protein encoded by this gene is a member of the peroxisome proliferator-ac

[24033] "Expressed as a 1.6-kb transcript, human PPP1CA Gene (PP1 Family) encodes cytop

[24034] "Human PPP2R1B Gene (PP2A Subunit A Family) encodes 601-aa 66-kDa Protein Phosp

[24035] "Expression increased on virus induction, human PRDM1 Gene encodes 789-aa 88-kD

[24036] "Expression increased on virus induction, human PRDM1 Gene encodes 789-aa 88-kD

[24037] "Human PRKCA Gene (PKC Family) encodes 672-aa 77-kDa Protein Kinase C-alpha, a

[24038] "Highly expressed (6-kb and 4.4-kb mRNA) in brain, lung, prostate, thymus, and

[24039] "Induced by interferon, 17-exon human PRKR Gene (GCN2 Family) encodes 551-aa 62

[24040] "With 22 coding exons, 15-kb human PTCH2 Gene (Patched Family) encodes 1203-aa

[24041] "Human PTHLH Gene encodes Parathyroid Hormone-Like Hormone, an anti-proliferati

[24042] "Ubiquitously expressed (most in brain), human PTK2 Gene (FAK Family) encodes F

[24043] "This gene encodes a cytoplasmic protein tyrosine kinase which is involved in c

[24044] "The protein encoded by this gene is a cytoplasmic nonreceptor protein kinase w

[24045] "Expressed in lung, liver, pancreas, kidney, placenta, melanocytes, thyroid gla

[24046] "Encodes a secreted growth factor that is mitogenic for endothelial, epithelial

[24047] "Human PTP4A1 Gene (PTP Family) encodes Protein Tyrosine Phosphatase IVA1, a re

[24048] "This gene encodes the founding member of the protein tyrosine phosphatase (PTP

[24049] "Human PTPN12 Gene (Non-Receptor PTP Family) encodes 780-aa 88-kDa cytoplasmic

[24050] "This gene encodes a protein tyrosine phosphatase which is expressed primarily

[24051] "Expressed predominantly in hematopoietic cells, human PTPN6 Gene (Non-Receptor

[24052] "Preferentially expressed as 2 distinct alternative isoforms in thymic and sple

[24053] "This gene encodes a member of the signal-regulatory-protein (SIRP) family, and

[24054] "The protein encoded by this gene is a member of the protein tyrosine phosphatase family, human PTPN11 Gene (PTP Family) at 12q24.1 encodes alternative isoforms of Protein Tyrosine Phosphatase 11B, a protein tyrosine phosphatase with a cytoplasmic tail that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24055] "Human PTPRE Gene (PTP Family) encodes alternative isoforms of Protein Tyrosine Phosphatase, Reluctant, a protein tyrosine phosphatase with a cytoplasmic tail that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24056] "Expressed in many tissues (likely developmentally regulated in brain), human PTPN12 Gene (PTP Family) at 12q24.1 encodes alternative isoforms of Protein Tyrosine Phosphatase 12, a protein tyrosine phosphatase with a cytoplasmic tail that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24057] "Expressed in all hematopoietic lineages, human PTPRJ Gene (PTP Family) encodes alternative isoforms of Protein Tyrosine Phosphatase, Reluctant, a protein tyrosine phosphatase with a cytoplasmic tail that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24058] "Expressed in brain, kidney, placenta, small intestine, stomach, uterus, or prostate, human PTPN13 Gene (PTP Family) at 12q24.1 encodes alternative isoforms of Protein Tyrosine Phosphatase 13, a protein tyrosine phosphatase with a cytoplasmic tail that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24059] "Expressed in the central nervous system, human PTPRT Gene (PTP Family) encodes alternative isoforms of Protein Tyrosine Phosphatase, Reluctant, a protein tyrosine phosphatase with a cytoplasmic tail that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24060] "Highly expressed in testis and spleen as two alternative transcripts, human RASA1 Gene (RAS Family) at 2p23.1 encodes RAS-Related GTP-Binding Protein RASA1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24061] "Human RAGA Gene at 9-21.3 encodes RAS-Related GTP-Binding Protein RAGA, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24062] "Expressed as a 2.2-kb transcript in heart, brain, lung, kidney, pancreas, placenta, and testis, human RASGEF1 Gene (RASGEF Family) at 12q24.1 encodes RAS-Related GTP-Binding Protein RASGEF1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24063] "Rapidly induced by retinoic acid as 2.4- and 6.8-kb transcripts, human RAI3 Gene (RASGEF Family) at 12q24.1 encodes RAS-Related GTP-Binding Protein RAI3, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24064] "Human RALGDS Gene at 9q34.3 encodes 914-aa 101-kDa RAL Guanine Nucleotide Dissociation Inhibitor 1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24065] "RanGAP1, is a homodimeric 65-kD polypeptide that specifically induces the GTPase activity of RAS family members, human RANBP1 Gene (RASGEF Family) at 12q24.1 encodes RAS-Related GTP-Binding Protein RANBP1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24066] "Human RAP1A Gene (RAS GTPase Family) at 1p13.3 encodes membrane-bound 184-aa 21-kDa RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24067] "Human RARB Gene (NR1 Family) at 3p24 encodes 4 alternative isoforms of Retinoic Acid Receptor 1, a nuclear receptor that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24068] "One of three retinoic acid receptor responders induced by the synthetic retinoic acid, human RARA Gene (NR1 Family) at 17q21.31 encodes Retinoic Acid Receptor 1, a nuclear receptor that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24069] "Expressed in a variety of tissues (heart strongest), human RASD1 Gene (RASD Family) at 12q24.1 encodes RAS-Related GTP-Binding Protein RASD1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24070] "Widely expressed as two alternative transcript variants, human RBBP9 Gene at 2p23.1 encodes RBBP9, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24071] "Restricted to G0 expression, human RBL2 Gene (RB Family) at 16q12.2 encodes 110-aa 12-kDa RBL2, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24072] "Widely expressed, human RBM5 Gene at 3p21.3 encodes in as many as 25 exons 815-aa 85-kDa RNA Binding Motif Protein 5, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24073] "Widely expressed, human RBM6 Gene at 3p21.3 encodes 1,123-aa RNA Binding Motif Protein 6, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24074] "Widely expressed human RBX1 Gene (RING-Box Family) at 22q13.2 encodes conserved 1,000-aa 100-kDa RING-Box Protein 1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24075] "Human RCN2 Gene (CREC Family) at 15q23 encodes ubiquitous 317-aa 55-kD calcium-binding protein, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24076] "Alternatively spliced transcript variants, alpha and beta, of human RFP Gene (TRIM Family) at 13q14.1 encodes RFP, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24077] "Two alternative transcript variants of human RFP2 Gene (TRIM Family) at 13q14.1 encodes RFP2, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24078] "Induced in response to several activation signals, 4-kb 4-exon B-cell specific, human RFP3 Gene (TRIM Family) at 13q14.1 encodes RFP3, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24079] "Expressed most in lung, placenta, liver, and heart, human RGS19 Gene (RGS Family) at 12q24.1 encodes RGS-Related GTP-Binding Protein RGS19, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24080] "Human RGS2 Gene (RGS Family, 5 exons and a 5-prime CpG island) at 1q31 encodes RGS-Related GTP-Binding Protein RGS2, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24081] "Multiple alternative transcript variants of human RGS3 Gene (RGS Family) at 9q34.3 encodes RGS-Related GTP-Binding Protein RGS3, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24082] "Human RHOK Gene (GPRK Family) at 13q34 encodes 563-aa 64-kDa membrane-bound RHO GTPase-activating protein, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24083] "Alternative transcript isoforms of 7-exon 14.5-kb human RIL Gene at 5q31.1 encodes RIL, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24084] "The gene product of the gene is a Serine/threonine kinase, and interacts with RHO GTPase-activating protein, human RIL2 Gene (RIL Family) at 5q31.1 encodes RIL2, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24085] "Expressed in heart, brain, placenta, skeletal muscle, kidney, pancreas, spleen, and testis, human RIL3 Gene (RIL Family) at 5q31.1 encodes RIL3, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24086] "Human RNF11 Gene at 1pter-p22.1 encodes 154-aa 17-kDa Ring Finger Protein 11, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24087] "Human ROCK1 Gene at 18q11.1 encodes Rho-Associated Coiled-Coil Containing Protein 1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24088] "Expressed in heart, lung, kidney, and CNS, human ROR1 Gene (ROR/Tyr Kinase Family) at 12q24.1 encodes ROR1, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24089] "Expressed during early embryonic development and only at low levels in adult testis, human ROR2 Gene (ROR/Tyr Kinase Family) at 12q24.1 encodes ROR2, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24090] "Human RORA Gene (NR1 Family) at 15q21-q22 encodes 4 alternative isoforms of Retinoic Acid Receptor 1, a nuclear receptor that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24091] "Down-regulated during adipocyte, kidney, and heart differentiation, human RPL11 Gene (RPL Family) at 12q24.1 encodes Ribosomal Protein L11, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24092] "Located in the tightly linked Surfeit Gene cluster and co-transcribed with small interfering RNA, human RPL12 Gene (RPL Family) at 12q24.1 encodes Ribosomal Protein L12, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24093] "The 6-exon 11-kb human RPS19 Gene (S19E Family) at 19q13.2 encodes 144-aa 16-kDa Ribosomal Protein S19E, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24094] "Expressed in actively proliferating cells, human RPS27 Gene (S27E Family) at 19q13.2 encodes Ribosomal Protein S27E, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24095] "Human RPS3 Gene (S3P Family) at 11q13.3-q13.5 encodes cytoplasmic and nuclear Ribosomal Protein S3P, a RAS family member that is constitutively active and has a transforming potential in fibroblasts and hematopoietic cells

[24096] "Widely expressed in heart, brain, placenta, lung, kidney, and liver, human RPS6KB2 Gene (S6 Ser/Thr Kinase Family) at 11q13.1 encodes 482-aa 53-kDa

[24097] "Human RPS6KB2 Gene (S6 Ser/Thr Kinase Family) at 11q13.1 encodes 482-aa 53-kDa

[24098] "Human RRAS2 Gene (RAS GTPase Family) at 11p15.2 encodes ubiquitous 204-aa 23-kDa

[24099] "Expressed as a 1.4-kb mRNA in brain, human RRP22 Gene (Small GTPase Family) at 10p11.2 encodes 204-aa 23-kDa

[24100] "Expressed as multiple alternative transcript variants, human RSU1 Gene at 10p11.2 encodes 204-aa 23-kDa

[24101] "Widely expressed, human RYK Gene (TYR Kinase Family) at 3q22 encodes 604-aa 68-kDa

[24102] "Human S100A11 Gene (S100 Family) at 1q21 encodes 105-aa 12-kDa homodimeric S100 Calcium Binding Protein A11

[24103] "Expressed in monocytes and lymphocytes, human S100A12 Gene (S100 Family) at 1q21 encodes 105-aa 12-kDa homodimeric S100 Calcium Binding Protein A12

[24104] "Constitutively expressed in epithelial cells and in macrophages during chronic inflammation, human S100A13 Gene (S100 Family) at 1q21 encodes 105-aa 12-kDa homodimeric S100 Calcium Binding Protein A13

[24105] "Constitutively expressed in epithelial cells and by macrophages in inflamed tissues, human S100A14 Gene (S100 Family) at 1q21 encodes 105-aa 12-kDa homodimeric S100 Calcium Binding Protein A14

[24106] "Human S100P Gene (S100 Family) at 4p16 encodes 95-aa 10-kDa S100 Calcium Binding Protein P

[24107] "Expressed in lung, skeletal muscle, kidney, peripheral leukocytes, spleen, brain, and testis, human S100B Gene (S100 Family) at 12q15 encodes 95-aa 10-kDa S100 Calcium Binding Protein B

[24108] "Human SCTR Gene (GPCR2 Family) at 2q14.1 encodes 440-aa 50-kDa (precursor) 7 transmembrane spanning protein

[24109] "Induced by PMA in activated T cells, human CCL1 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24110] "This gene is one of several Cys-Cys (CC) cytokine genes clustered on the q-arm of chromosome 17

[24111] "Induced by IL-1 and TNF-alpha and widely expressed, human CCL13 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24112] "Constitutively expressed in several tissues, human CCL14 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24113] "Widely expressed human CCL15 Gene (Interkrine Beta Family), at 17q11.23 encodes 10-kDa chemokine

[24114] "Expressed in thymus, lung, colon, and small intestine and induced by PHA in monocytes, human CCL16 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24115] "Induced by glucocorticoids, PMA, IL-4, IL-13, and IL-10 and expressed in lung, thymus, spleen, and small intestine, human CCL17 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24116] "Expressed in lymph nodes, thymus, appendix, colon, trachea, spleen, small intestine, and testis, human CCL18 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24117] "Repressed by IL-10 and induced by LPS, PMA, TNF, and INF Gamma in liver, lymph nodes, and spleen, human CCL19 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24118] "This gene encodes small Inducible cytokine A2, a member of cytokine family. It is induced by IL-1 and TNF-alpha and widely expressed

[24119] "Expressed in macrophage, monocyte-derived dendritic cells, thymus, lymph node, spleen, and small intestine, human CCL20 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24120] "Expressed in lung, liver, skeletal muscle, bone marrow, placenta, pancreas, and testis, human CCL21 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24121] "Expressed by activated monocytes and activated T lymphocytes, human CCL24 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24122] "Expressed by dendritic cells in thymus and small intestine, CCL25 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24123] "Ubiquitously expressed human CCL26 Gene (Interkrine Beta Family) at 7q11.23 encodes 10-kDa chemokine

[24124] "Expressed in testis, thymus, placenta, ovary, and skin, human CCL27 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24125] "Macrophage Inflammatory Protein-1 is a monokine involved in the acute inflammatory response, human CCL28 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24126] "The CCL3L1 gene encodes Chemokine (C-C Motif) Ligand 3-Like 1, which belongs to the C-C motif chemokine subfamily 3

[24127] "Induced rapidly after T-cell (phytohemagglutinin, mitogens), B-cell, and monocyte activation, human CCL3L1 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24128] "This gene encodes a small inducible cytokine A5 which is one of the major HIV-1 coreceptors, human CCL5 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24129] "The CCL7 gene encodes Small Inducible Cytokine A7, a secreted chemokine which is induced by IL-1 and TNF-alpha and widely expressed

[24130] "This gene encodes a small inducible cytokine A8 which displays chemotactic activity, human CCL8 Gene (Interkrine Beta Family) at 17q11.23 encodes 10-kDa chemokine

[24131] "Induced by Interferon Gamma, human CXCL10 Gene (Interkrine Alpha/Chemokine CXC Family) at 10q26 encodes 84-aa 10-kDa chemokine

[24132] "Induced by INF gamma and INF beta in leukocytes, pancreas, liver, astrocytes, and testis, human CXCL10 Gene (Interkrine Alpha/Chemokine CXC Family) at 10q26 encodes 84-aa 10-kDa chemokine

[24133] "Expressed in liver, spleen, lymph node, Peyer's patches, appendix, stomach, and small intestine, human CXCL10 Gene (Interkrine Alpha/Chemokine CXC Family) at 10q26 encodes 84-aa 10-kDa chemokine

[24134] "Expressed in heart, brain, placenta, lung, liver, skeletal muscle, kidney, and testis, human CXCL10 Gene (Interkrine Alpha/Chemokine CXC Family) at 10q26 encodes 84-aa 10-kDa chemokine

[24135] "Encodes Epithelial Neutrophil Activating Peptide 78, a 78 amino acid member of the chemokine family, human CXCL10 Gene (Interkrine Alpha/Chemokine CXC Family) at 10q26 encodes 84-aa 10-kDa chemokine

[24136] "Human CXCL6 Gene (Interkrine Alpha/Chemokine CXC Family) at 4q21 encodes secreted 60-aa 7-kDa chemokine

[24137] "Expressed (0.8-kb mRNA) in activated CD8+ T cells, in spleen, thymus, small intestine, and testis, human CXCL6 Gene (Interkrine Alpha/Chemokine CXC Family) at 4q21 encodes secreted 60-aa 7-kDa chemokine

[24138] "Expressed, like XCL1, in activated T cells (low levels in unstimulated cells),

[24139] "This gene encodes small inducible cytokine D1 that is the first member of a fo

[24140] "The 10-kb human CXCL12 Gene (Interchrine Alpha/Chemokine CXC Family) at 10q11.1

[24141] "This gene encodes a transmembrane and secreted protein with characteristics of

[24142] "Human SEMA3E Gene (Semaphorin Family) at 7q21.11 encodes 775-aa 89-kDa (precur

[24143] "Expressed in pancreas and adipose tissues, 8-exon human SERPINI2 Gene (PAI-1 S

[24144] "Expressed in all tissues and responsive to serum factors, contact inhibition,

[24145] "Widely expressed (high in testis) human SETDB1 Gene (Suvar3-9 Family) at 1q21

[24146] "The 14-3-3 sigma gene encodes a putative cytoplasmic, p53-regulated homodimeri

[24147] "Human SFRP4 Gene (SFRP Family) at 7p14.1 encodes Secreted Frizzled-Related Pro

[24148] "Human SH2B Gene at 16p12.1 encodes SH2-B Homolog, similar to rat (FceRI gamma-

[24149] "Expressed in placenta, pancreas, kidney, lung, fetal kidney, and fetal lung as

[24150] "Expressed in a variety of tissues as 3.2- and 3.8-kb transcripts, human SH2D3C

[24151] "Widely expressed as 3 isoforms, p66SHC, p52SHC and p46SHC, by alternative init

[24152] "Expressed in the brain as a 10-kb transcript, human SHC3 Gene at 9q22.1 encode

[24153] "Expressed only during embryogenesis, human SHH Gene (Hedgehog Family) at 7q36

[24154] "Expressed as 2 alternative isoforms in monocytes and dendritic cells, human SI

[24155] "Widely expressed with immediate early kinetics upon serum stimulation, human S

[24156] "This gene encodes a DEAD box protein which a ATP-dependent RNA helices, may be

[24157] "Expressed as 3 alternative isoforms, alpha (42-aa 48-kDa), beta (410-aa), and

[24158] "Human SLC26A3 Gene (SLC26A/Sulp Transporter Family) encodes 764-aa 85-kDa Chlo

[24159] "Broadly expressed as a 2.7-kb transcript (highest in liver, pancreas, prostate

[24160] "The protein encoded by this gene appears to be 7-transmembrane G protein-coupl

[24161] "Serum-inducible kinase is a member of the 'polo' family of serine/threonine pr

[24162] "Human FRS2 Gene at 12q15 encodes 508-aa 56.8-kD FGFR Signalling Adaptor, conta

[24163] "The protein encoded by this gene is a substrate for the fibroblast growth fact

[24164] "This gene, a member of the SNW gene family, encodes a coactivator that enhance

[24165] "Expressed as a 0.9-kb transcript, 5-exon human SRP19 Gene (SRP19 Family) at 5q

[24166] "Human SRPUL Gene at Xq21.33-q23 encodes Sushi-Repeat Protein. (NCI)"

[24167] "Human SSH3BP1 Gene at 10p11.2 encodes Spectrin SH3 Domain Binding Protein 1, c

[24168] "SSPN gene is expressed in a variety of tissues with highest levels in muscle,

[24169] "Expressed primarily by the hypothalamic median eminence and by pancreatic delt

[24170] "Somatostatin acts at many sites to inhibit the release of many hormones and ot

[24171] "Somatostatin binds to a group of structurally related tissue-specific high-aff

[24172] "Expressed in fetal and adult brain, lung, stomach, kidney, pituitary, and adre

[24173] "The protein encoded by this gene is an adaptor protein that mediates the assoc

[24174] "The protein encoded by this gene is a member of the STAT protein family. In re

[24175] "The protein encoded by this gene is a member of the STAT protein family. In re

[24176] "The protein encoded by this gene is a member of the STAT protein family. In re

[24177] "The protein encoded by this gene is a member of the STAT family of transcripti

[24178] "The protein encoded by this gene is a member of the STAT family of transcripti

[24179] "Expressed as a 4-kb, and a less abundant 2-kb, mRNA in most tissues (ovary, pr

[24180] "Widely expressed as multiple transcripts in muscle and heart (strongest), pancreas, and placenta, human TGFBR1 Gene (TGFBR Family) at 12q24.1 encodes 733-aa 80-kDa Protein

[24181] "Expressed as multiple transcript variants that encode the same protein in testis, human TGFBR2 Gene (TGFBR Family) at 12q24.1 encodes 733-aa 80-kDa Protein

[24182] NA

[24183] "Human SUI1 Gene (SUI1 Family) at 17q21.2 encodes 113-aa 12.7-kDa Protein Transmembrane Receptor

[24184] "The function of this gene has not yet been determined; however, it is speculated to function as a receptor for tachykinin

[24185] "This gene belongs to a family of genes that function as receptors for tachykinin

[24186] "Human TAL2 Gene at 9q32 (33-kb from the t(7;9)(q34;q32) breakpoint specifically expressed in testis, human TAL2 Gene encodes 103-aa 11-kDa Protein

[24187] "With highest expression of a 6-kb transcript in kidney, heart, placenta, and liver, human TCF3 Gene encodes 654-aa 65-kDa Protein

[24188] "This gene encodes a protein that is similar to I-kappa-B (IKB) kinases, which function as co-repressors of NF-kappa-B

[24189] "Alternatively spliced human TCF3 Gene encodes E12 and E47 isoforms of 654-aa 65-kDa Protein

[24190] "Member of the high mobility group (HMG) family of DNA-binding proteins; activates transcription of DNA

[24191] "Related to TCL1A oncogene, a gene involved in the development of T-cell leukemia, human TCTA Gene encodes 103-aa 11-kDa Protein

[24192] "Ubiquitously expressed (highest in kidney), human TCTA Gene encodes 103-aa 11-kDa Protein

[24193] "The protein encoded by this gene belongs to the Tec family, which is a subfamily of the Src family of tyrosine kinases

[24194] "Expressed predominantly in endothelia and angioblasts, human TEK Gene (TIE Family) encodes 733-aa 80-kDa Protein

[24195] "Similar in structure to TFAP2A, 10-kb human TFAP2C Gene (AP-2 Family) at 20q13.1 encodes 103-aa 11-kDa Protein

[24196] "Expressed in heart, skeletal muscle, placenta, kidney, brain, lung, and liver, human TFE3 Gene (bHLH Family) encodes 743-aa 80-kDa Protein

[24197] "Ubiquitously expressed 7-exon human TFE3 Gene (bHLH Family) encodes 743-aa 80-kDa Protein

[24198] "Transforming growth factors (TGFs) are biologically active polypeptides that regulate cell growth and differentiation

[24199] "The TGFB1 gene at 19q13.1 encodes Transforming Growth Factor Beta 1 (TGF-Beta 1), which is a disulfide-linked homodimer

[24200] "The TGFB2 gene encodes TGF-beta 2, which is a disulfide-linked homodimer belonging to the TGF-beta family

[24201] "Constitutively expressed in many tissues (high in corneal epithelium) and induced in many tumor types, human TGFBR1 Gene (TGFBR Family) at 12q24.1 encodes 733-aa 80-kDa Protein

[24202] "Expressed in all tissues (most in placenta), 9-exon 31-kb human TGFBR1 Gene (TGFBR Family) at 12q24.1 encodes 733-aa 80-kDa Protein

[24203] "Human TGFBR3 Gene encodes 849-aa 93-kDa (precursor) Transforming Growth Factor Receptor Type III, which is a disulfide-linked homodimer

[24204] "Specifically expressed in developing endothelial cells, human TIE Gene (TIE Tyrosine Kinase Family) encodes 733-aa 80-kDa Protein

[24205] "Ubiquitously expressed (highest in spleen, ovary, leukocytes, thymus, and small intestine), human TLR2 Gene (TLR Family) at 10q26.3 encodes 101-aa 11-kDa Protein

[24206] "Highly expressed in monocytes, bone marrow, lymph node, and spleen, human TLR2 Gene (TLR Family) at 10q26.3 encodes 101-aa 11-kDa Protein

[24207] "Expressed most in placenta, pancreas, and CD11c+ immature dendritic leukocytes, human TLR4 Gene (TLR Family) at 2q37.3 encodes 101-aa 11-kDa Protein

[24208] "Expressed most in placenta, spleen, and myelomonocytic leukocytes, human TLR4 Gene (TLR Family) at 2q37.3 encodes 101-aa 11-kDa Protein

[24209] "Highly expressed in ovary and myelomonocytic cells, human TLR5 Gene (TLR Family) at 9q34.11 encodes 101-aa 11-kDa Protein

[24210] "Expressed in monocytes, CD11c+ immature dendritic cells, and dermal endothelial cells, human TLR6 Gene (TLR Family) at 10q26.3 encodes 101-aa 11-kDa Protein

[24211] "Expressed in lung, placenta, spleen, brain, stomach, small intestine, and prefrontal cortex, human TLR7 Gene (TLR Family) at 10q26.3 encodes 101-aa 11-kDa Protein

[24212] "Expressed in lung, brain, heart, liver, placenta, monocytes, peripheral leukocytes, and spleen, human TLR8 Gene (TLR Family) at 2q37.3 encodes 101-aa 11-kDa Protein

[24213] NA

[24214] "Expressed in small intestine, prostate, colon, stomach, and salivary gland, human TNFRSF10A Gene (TNF Receptor Superfamily) at 12q24.1 encodes 101-aa 11-kDa Protein

[24215] "The protein encoded by this gene is a member of the TNF-receptor superfamily. It is a type I transmembrane protein with an extracellular domain that is similar to the TNF-receptor superfamily

[24216] "This gene has multiple transcript variants but the full length nature of some of them is unknown

[24217] "This gene encodes a member of the tumor necrosis factor (TNF) cytokine family

[24218] "Expressed as a 3-kb transcript in prostate, testis, ovary, small intestine, and placenta, human TOLLIP Gene encodes 274-aa 30-kDa oligomeric Toll-Interacting Protein, which is a member of the TNF-receptor superfamily

[24219] "Human TOLLIP Gene encodes 274-aa 30-kDa oligomeric Toll-Interacting Protein, which is a member of the TNF-receptor superfamily

[24220] "Expressed as a 3.3-kb transcript in several tissues, human TPD52 Gene (TPD52 Family) at 12q24.1 encodes 101-aa 11-kDa Protein

[24221] "Expressed as a 1.5-kb transcript in kidney and skin, human TPD52L1 Gene (TPD52 Family) at 12q24.1 encodes 101-aa 11-kDa Protein

[24222] "Expressed as a 4.5-kb transcript in various tissues, human TRPM5 Gene encodes
[24223] "Human TRRAP Gene (TRA1 Kinase Family) encodes 3859-aa 438-kDa and 3830-aa isof
[24224] "Human TSHR Gene (FSH/LSH/TSH GPCR1 Family) encodes alternative long and short
[24225] "This gene may play a role in testicular physiology, spermatogenesis or spermic
[24226] "This gene encodes a hemopoietic cytokine proposed to signal through a heterodi
[24227] "Likely up-regulated by androgen and expressed in spermatogonia and spermatocyt
[24228] "This gene was identified as being in a region in which loss of heterozygosity
[24229] "Expressed as a 4-kb mRNA in proliferating cells, human TTK Gene (Ser/Thr Kinas
[24230] "In response to CXCL16 CXCR6 probably functions in interactions between dendrit
[24231] "Widely expressed (abundant in brain), human TYRO3 Gene (AXL/UFO Tyr Kinase Fam
[24232] "Human TYROBP Gene encodes 113-aa 12-kDa (precursor) disulfide-linked homodimer
[24233] "Human UBE2D2 Gene (E2 Ubiquitin-Conjugating Enzyme Family) encodes 147-aa 16.7
[24234] "Human UNC13 Gene encodes 1591-aa UNC-13 Homolog B, containing 3 C2 domains, a
[24235] "Some evidence suggests that the human Ubiquitin Specific Protease 6 Gene locus
[24236] "Related to TRE2 oncogene, human Ubiquitin Specific Protease 8 Gene (C19 Peptid
[24237] "Human VAV3 Oncogene (VAV Family) at 1p13.2 encodes an 847-amino acid VAV-3 Pro

[24489] "A period or stage in life, usually stated in years since birth."
[24490] "A natural recurring desire for food. (On-line Medical Dictionary)"
[24491] "Autopsy; an examination and dissection of a dead body to determine cause of de
[24492] "Axis; a straight line through a body or figure that satisfies certain conditio
[24493] "The event of being born."
[24494] "A measure of the 2-dimensional extent of the body surface."
[24495] "A pill in the form of a small rounded soluble container with medicine inside."
[24496] "Carcinoembryonic antigen. A substance that is sometimes found in an increased
[24497] "City; a large and densely populated urban area."
[24498] "Classification; the grouping of things into classes or categories."
[24499] "A system of numbered categories for representation of data."
[24500] "A Coombs test is performed to detect the presence of antibodies against red bl
[24501] "A particular day specified as the time something has, or will, happen."
[24502] "Daughter; a female human offspring."
[24503] "In healthcare, discharge represents the end point of an inpatient hospital con
[24504] "The space between two objects or points."
[24505] "Donor; someone who gives blood or tissue or an organ to be used in another per
[24506] "A method of achieving something. (from Cambridge Advanced Learner's Dictionary
[24507] "E-mail is short for \"electronic mail\" and refers to composing, sending, and
[24508] "The act of determining if a subject is suitable for enrollment in a study acco
[24509] "Employment; the occupation for which you are paid."
[24510] "Family; a domestic group, or a number of domestic groups linked through descen
[24511] "Father; a male parent."
[24512] "Filed; placed in a file; record in a public office or in a court of law."
[24513] "Projection; a prediction made by extrapolating from past observations."
[24514] "The external sex organs."
[24515] "Health; the general condition of body and mind."

[24516] "Hospitalization; the condition of being treated as a patient in a hospital."
[24517] "An event, entity or condition that typically characterizes a prescribed environment."
[24518] "Industry; the people or companies engaged in a particular kind of commercial enterprise."
[24519] "Inpatient; a patient who is residing in the hospital where he is being treated."
[24520] "A family of homotetrameric cytoplasmic enzymes involved in the conversion of L-tryptophan to 5-hydroxytryptophan."
[24521] "Laterality; having to do with the use or development of one side of the body."
[24522] "High density lipoproteins are the smallest and densest lipoproteins, and contain the highest percentage of protein."
[24523] "Low-density lipoprotein (LDL) is a lipoprotein that carries cholesterol around the body."
[24524] "A demographic parameter indicating a person's status with respect to marriage, divorce, or remarriage."
[24525] "Mother; a female parent."
[24526] "Person; a human being."
[24527] "A language unit by which a person or thing is known."
[24528] "Occupation; the principal activity that a person does to earn money."
[24529] "Compliance; acting according to certain accepted standards."
[24530] "The force applied to a unit area of surface."
[24531] "The allocation of individuals to groups, e.g., for experimental and control groups."
[24532] "Recommendation; advice telling someone what the best thing to do is."
[24533] "Record; anything, e.g. a document, providing permanent evidence of or information."
[24534] "Role; the action or activity assigned to or required or expected of a person or group."
[24535] "The individual as the object of his own reflective consciousness."
[24536] "Sensitivity; the ability to respond to physical stimuli or to register small physical changes."
[24537] "Activity measured as a test of liver function, 46/47-kDa homodimeric human Aspartate Aminotransferase."
[24538] "The region of the body between the neck and the upper arm."
[24539] "Sibling; a person's brother or sister."
[24540] "Son; a male human offspring."
[24541] "Temperature; the degree of hotness or coldness of a body or environment."
[24542] "Time is the continuum of experience in which events pass from the future through the present to the past."
[24543] "The vertical force exerted by a mass as a result of gravity."
[24544] "Measurement; the size or magnitude of something."
[24545] "Fax; short for facsimile; telecommunications technology used to transfer copies of documents."
[24546] "A schedule is an ordered list of times at which things are planned to occur."
[24547] "An endpoint is a place of termination or completion; in a clinical trial this is the point at which the trial is terminated."
[24548] "Baseline; an imaginary standard by which things are measured or compared."
[24549] "Evaluation; the act of placing value on something."
[24550] "Karyotype; the appearance of the chromosomal makeup of a somatic cell in an individual."
[24551] "A diaphragm or system of diaphragms made of an absorbing material, designed to absorb X-rays."
[24552] "Having determined the value, significance, or extent of."
[24553] "A particular course of action intended to achieve a result."
[24554] "The preservation and hardening of a tissue sample to retain as nearly as possible its natural structure."
[24555] "Incision into or through the sternum."
[24556] "Tomogram; a radiograph obtained by tomography."
[24557] "Bronchial; of, or pertaining to, the bronchus."

[24558] "Pleural; of, or pertaining to, the pleura."
[24559] "By or having to do with the rectum. The rectum is the last 6 inches of the large intestine."
[24560] "Renal; of, or pertaining to, the kidney."
[24561] "Mesenteric; of, or relating to, or located in a mesentery."
[24562] "High; greater than normal in degree or intensity or amount."
[24563] "Right; being or located on or directed toward the side of the body to the east."
[24564] "Left; being or located on or directed toward the side of the body to the west."
[24565] "Lateral; situated at or extending to the side."
[24566] "Anterior; denoting the front surface of the body; often used to indicate the position of a structure."
[24567] "Medial; toward the middle or inside (as opposed to lateral)."
[24568] "Peripheral; on or near an edge or constituting an outer boundary; the outer area of a structure."
[24569] "Internal; happening or arising or located within some limits, or especially, within a structure."
[24570] "Superior; in anatomy indicating higher than a given reference point."
[24571] "In medicine, refers to a part of the body that is closer to the center of the body."
[24572] "Distal; situated farthest from a point of attachment or origin, as of a limb or organ."
[24573] "Segmental; having naturally dividable parts."
[24574] "Affecting cells on the surface. Not invasive."
[24575] "Deep; extending relatively far inward."
[24576] "Horizontal; parallel to or in the plane of the horizon."
[24577] "Longitudinal; running lengthwise."
[24578] "Vertical; upright in position or posture."
[24579] "Area; the extent of a 2-dimensional surface enclosed within a boundary."
[24580] "Surface; the extended two-dimensional outer boundary of a three-dimensional object."
[24581] "Positive; involving advantage or good."
[24582] "Negative; involving disadvantage or harm."
[24583] "Long; of relatively great or greater than average spatial extension or temporal duration."
[24584] "Short; having little (physical) length or seeming to be limited in (temporal) duration."
[24585] "Complete; having every necessary or normal part or component or step; or having all parts."
[24586] "Occurring first in time or sequence; original. (American Heritage Dictionary)"
[24587] "Microscopic; too small to be seen except under a microscope."
[24588] "Multifocal; arising from or pertaining to many locations."
[24589] "Progressive; advancing in extent or severity."
[24590] "Soft; lacking in hardness relatively or comparatively."
[24591] "Quantity; how much there is of something that you can measure."
[24592] "Phase; any distinct time period in a sequence of events"
[24593] "Most; greatest in amount, extent, or degree."
[24594] "Mixed; involving or composed of different kinds."
[24595] "Third; following the second position in an ordering or series."
[24596] "Medical; relating to the study or practice of medicine."
[24597] "(noor-uh-LOJ-ik) Having to do with nerves or the nervous system."
[24598] "Prognostic; having value for making predictions."
[24599] "A ridge or ridge-like structure. In humans it usually refers to the trachea."

[24600] NA
[24601] "Having to do with the intestines."
[24602] "Lymphatic; of, or relating to, or produced by lymph."
[24603] "The region below the clavicle."
[24604] "Having to do with symptoms, which are signs of a condition or disease."
[24605] "Extension; an addition to the length of something."
[24606] "Painful; causing physical or psychological misery, pain or distress."
[24607] "Painless; not causing physical or psychological misery, pain or distress."
[24608] "Residence; the place where a person lives."
[24609] "Existing in fact; real. (from American Heritage Dictionary)"
[24610] "Occurrence; an instance of something happening."
[24611] "Neural Cell Adhesion Molecule is a membrane-bound glycoprotein member of the I
[24612] "Therapeutic; relating to or involved in therapy."
[24613] "Fluid; a continuous amorphous substance that tends to flow and to conform to t
[24614] "Onset; the beginning or early stages."
[24615] "Recent; near to or not long before the present."
[24616] "Associated; joined in some kind of relationship."
[24617] "Within; on the inside; contained in."
[24618] "Quality; a degree or grade of excellence or worth; an essential and distinguis
[24619] "Type; a subdivision of a particular kind of thing."
[24620] "Diameter; the length of a straight line passing through the center of a circle
[24621] "Necrotic; relating to or affected by necrosis."
[24622] "Rod-shaped structures of uncertain nature in the cytoplasm of immature myeloid
[24623] "An abnormal large leukocyte found in the blood in hairy cell leukemia; it has
[24624] "Brother; a male sibling."
[24625] "Having been legally made a member of a family."
[24626] "Venous; of, or pertaining to, or contained in, or performing the function of t
[24627] "Cardiovascular; pertaining to the heart or blood vessels."
[24628] "Activity measured as a test of liver function, human Glutamic-Pyruvate Transam
[24629] "Test; any standardized procedure for determining the presence, quality, or tru
[24630] "Mobile; moving or capable of moving readily."
[24631] "Birth Date; the calendar date on which a person was born."
[24632] "Notification; informing by words."
[24633] "Systolic Pressure; the blood pressure during the contraction of the left ventr
[24634] "Diastolic Pressure; the blood pressure after the contraction of the heart whil
[24635] "Any laboratory procedure for growing microorganisms."
[24636] "The time for Earth to make a complete rotation on its axis; ordinarily divided
[24637] "Granulomatous; relating to or characterized by granulomas."
[24638] "Having many centers. A multicentric cancer consists of a primary tumour with s
[24639] "Total; constituting the full quantity or extent; complete."
[24640] "An appraisal or evaluation of a patient's condition by a physician or register
[24641] "One of the two lateral margins or surfaces of a body, midway between the front

[24642] "Contralateral; on or relating to the opposite side (of the body)"
[24643] "Having to do with the same side of the body."
[24644] "Lower; the bottom one of two."
[24645] "Mediastinal; related to the mediastinum."
[24646] "By or having to do with the mouth."
[24647] "Parietal; of, or relating to, or associated with the parietal bones."
[24648] "Having to do with the peritoneum (the tissue that lines the abdominal wall and
[24649] "Radial; arranged like rays or radii; radiating from a common center."
[24650] "Having to do with the viscera, which are the soft internal organs of the body,
[24651] "Regions near to the aorta."
[24652] "Regions near to the trachea."
[24653] "Subaortic; below the aorta."
[24654] "Place; the particular portion of space occupied by a physical object."
[24655] "An action plan for a clinical trial. The plan states what the study will do,
[24656] "Distant; far apart in space, time, or relevance."
[24657] "Long-Term; involving or being in effect for a long time."
[24658] "Nodal; of or pertaining to a node, any bulge or swelling of an anatomical stru
[24659] "Viable; capable of life or normal growth and development."
[24660] "A flat rectangular piece of glass on which specimens can be mounted for micros
[24661] "Whole; including all components without exception; being one unit or constitut
[24662] "Core; the center of an object; indispensable"
[24663] "Unrelated; not connected or associated e.g. by kinship."
[24664] "Supraclavicular; positioned above the clavicle."
[24665] "Duration; the period of time during which something continues."
[24666] "Progression; advancement in extent or severity."
[24667] "The range, magnitude, or distance over which a thing spans an interval of dist
[24668] "Depth; extent downward or inward."
[24669] "Length; the linear extent in space from one end to the other."
[24670] "Volume; the amount of 3-dimensional space occupied by an object."
[24671] "Pattern; anything characterized by repetition."
[24672] "Number; a concept of quantity derived from zero and units; a numeral or string
[24673] "Score; a number or letter indicating quality."
[24674] "Position; the particular portion of space occupied by a physical object."
[24675] "Use; put into service; make work or employ (something) for a particular purpos
[24676] "Location; a point or extent in space."
[24677] "Having to do with the abdomen, which is the part of the body between the chest
[24678] "The means by which an effect is obtained."
[24679] "Regions near to the esophagus."
[24680] "Width; the extent of something from side to side."
[24681] "Class; a collection of things sharing a common attribute."
[24682] "Height; the vertical dimension of extension; distance from the base of somethi
[24683] "Having to do with muscles, bones, and cartilage."

[24684] "Polypectomy; surgical removal of a polyp."
[24685] "Genitourinary; of or related to the genital and urinary organs or their functions."
[24686] "Reconstruction; surgical restoration of function or form of a part."
[24687] "A system, commonly called the INR, established by the World Health Organization."
[24688] "Inferior; in anatomy indicating lower than a given reference point."
[24689] "The Academic Degree is an award conferred by a college, university, or other postsecondary institution."
[24690] "Upper; higher in place or position; the topmost one of two."
[24691] "Documented; furnished with or supported by documents."
[24692] "Registrar; someone responsible for keeping records."
[24693] "Attribution; assigning to a cause or source."
[24694] "Expectancy; something expected (as on the basis of a norm)."
[24695] "Mutant; refers to an organism, population, gene, or chromosome, etc. which differs from the normal form."
[24696] "Performance; process or manner of functioning or operating."
[24697] "Success; an event that accomplishes its intended purpose."
[24698] "Having to do with nerves or the nervous system, including the brain and the spinal cord."
[24699] "One or more characters used to identify, name, or characterize the nature, properties, or uses of something."
[24700] "Description; a statement that represents something in words."
[24701] "Closure; refers to the closing of a study to enrollment."
[24702] "The final result of a determination of the value, significance, or extent of something."
[24703] "Member; one of the persons who compose a social group especially individuals who are members of a group."
[24704] "1. The act of agreeing. 2. Harmony of opinion; accord. (from American Heritage Dictionary)"
[24705] "Exclusion; the act of restricting entrance or barring from participation."
[24706] "Payment; a sum of money paid."
[24707] "Category; used informally to mean a class of things."
[24708] "Classified; arranged in classes or categories."
[24709] "Options; alternative choices or actions."
[24710] "Report; a short account."
[24711] "Small; limited in number or quantity or magnitude or extent."
[24712] "Appearance; the outward or visible aspect of a person or thing."
[24713] "Partial; being or affecting only a part; not total"
[24714] "Course; a connected series of events or actions or developments"
[24715] "End Date; the calendar date on which an event ceased."
[24716] "Maiden Name; a woman's surname before marriage."
[24717] "Given."
[24718] "Begin Date; the calendar date on which an event began."
[24719] "A system for describing the extent of cancer in a patient's body. T describes the extent of cancer in the tumor, N describes the extent of cancer in the nodes, and M describes the extent of cancer in the metastases."
[24720] "The condition of being allowed to enter."
[24721] "The counting of cells, especially blood cells, using a cytometer or hemocytometer."
[24722] "Benefits; the positive effects of something."
[24723] "Local-Regional; affecting only a restricted part or area of the body."
[24724] "The part of the human body between the neck and the diaphragm or the corresponding part of another animal."
[24725] "Index; a numerical scale used to compare variables with one another or with some standard value."

[24726] "Analysis; examination and interpretation."
[24727] "Manufacturer Name; the name of a business engaged in manufacturing some product."
[24728] "Comments; a written explanation or criticism or illustration that is added to a document."
[24729] "A dose of medicine in the form of a small pellet."
[24730] "Telephone; electronic equipment that converts sound into electrical signals that can be transmitted over a distance."
[24731] "An act or means of approaching, or, the right to enter or use. (from American Heritage Dictionary)"
[24732] "Application; the work of applying something."
[24733] "Clinical; relating to a clinic or conducted in or as if in a clinic and dependent on the results of a clinical examination."
[24734] "Having to do with the pelvis (the lower part of the abdomen located between the hip bones)."
[24735] "The Zubrod Score is one scale for indicating a patient's functional level: 0 = Able to perform all usual activities of daily living; 1 = Able to perform only light activities of daily living; 2 = Able to perform only minimal activities of daily living; 3 = Bedridden, unable to get out of bed without assistance; 4 = Death."
[24736] "Deviating from the norm."
[24737] "A control number unique to an object, used to identify it among the other objects in a study."
[24738] "The process of obtaining subjects for a study."
[24739] "Action; a thing done."
[24740] "The date a trial was opened to accrual."
[24741] "Added; extra. (from American Heritage Dictionary)"
[24742] "The location at which an organization or person can be reached. (from American Heritage Dictionary)"
[24743] "Next to or adjoining."
[24744] "The act of administration."
[24745] "Written notification to the FDA that a subject in a study has experienced an adverse event."
[24746] "Far along in course."
[24747] "One associated with."
[24748] "Associated with."
[24749] "Aliquot; pertaining to a portion of the whole; any one of two or more samples of a whole."
[24750] "Available in place of something else."
[24751] "Amended; corrected, or altered formally."
[24752] "The total quantity or number."
[24753] "Amplification; addition of extra material."
[24754] "The transitional zone between the moist, hairless, modified skin of the anal canal and the normal skin of the perianal area."
[24755] "Analyzed; having been subject to examination and interpretation."
[24756] "Anatomic; relating to anatomy."
[24757] "Anterolateral; denoting the area of the body in front and away from the middle."
[24758] "Relating to or located at the tip (an apex). (On-line Medical Dictionary)"
[24759] "Approach; a way of entering or leaving."
[24760] "Approved; established by authority; given authoritative approval."
[24761] "Assignment; an undertaking that you have been assigned to do."
[24762] "Used to indicate position, location, or state (American Heritage Dictionary)"
[24763] "Atypical; varying from the norm."
[24764] "Available; obtainable or accessible and ready for use or service."
[24765] "Basis; the fundamental assumptions underlying an explanation or a relation that is based on them."
[24766] "Begin; have a beginning, in a temporal, spatial, or evaluative sense."
[24767] "Best; having the most positive qualities."

[24768] "Relating to, or performed by, both hands."
[24769] "Biochemical; of or relating to biochemistry; involving chemical processes in l
[24770] "Biphasic; having two phases."
[24771] "Blocks; refers to preserved specimens embedded in support material."
[24772] "Bone Marrow Stem Cell Transplantation is the transfer of bone marrow stem cell
[24773] "Boost; increase or raise."
[24774] "The boundary of a surface or object."
[24775] "Bottom; the lowest part, side, or surface of anything"
[24776] "Calcified; having calcium deposited on or in an anatomic structure."
[24777] "The Cancer and Leukemia Group B (CALGB) is a national clinical research group
[24778] "The amount that can be contained."
[24779] "A natural hollow or sinus within the body."
[24780] "Center; a point or area that is approximately central within some larger regio
[24781] "Change; alteration or modification."
[24782] "Characteristics; distinguishing qualities of a person, object, or substance."
[24783] "Something observed through clinical or radiologic examination."
[24784] "Closest; indicating the one of several that is the shortest distance away."
[24785] "Coated; covered with an outer layer or film."
[24786] "The Children's Oncology Group was formed by the merger of the four national pe
[24787] "Collected; brought together in one place."
[24788] "The act of gathering something together."

[24820] "Disruption; an event that results in a displacement or discontinuity."
[24821] "Dominant; exercising influence or control."
[24822] "The amount of medicine taken, or radiation given, at one time."
[24823] "Dryness; lacking moisture, or the feeling thereof."
[24824] "During; at some time in."
[24825] "The Eastern Cooperative Oncology Group (ECOG) was established in 1955. This is
[24826] "Effect; a phenomenon that follows and is caused by some previous phenomenon."
[24827] "Elevated; raised or increased."
[24828] "Elevation; the condition of being elevated."
[24829] "Emotional; excessively affected by emotion."
[24830] "End; the point in time at which an event ceases."
[24831] "Entire; constituting the full quantity or extent; complete."
[24832] "Estimated; calculated approximately."
[24833] "Event; something that happens at a given place and time."
[24834] "Examined; having been subjected to an examination."
[24835] "Expected; considered likely or probable."
[24836] "Situated outside of a capsule, esp. outside the capsular ligament of a joint."
[24837] "Outside of, or unrelated to, any medulla, especially the medulla oblongata."
[24838] "Situated outside of a node."
[24839] "Situated outside of the prostate."
[24840] "Factor; anything that contributes causally to a result."
[24841] "Field; a branch of knowledge."
[24842] "Final; conclusive in a process or progression."
[24843] "First; preceding all others in time or space or degree."
[24844] "Relating to or resembling a fissure."
[24845] "Foci; plural of focus; a central point or locus of an infection."
[24846] "Foreign; not belonging to that in which it is contained; introduced from another source."
[24847] "Formation; the act of forming something."
[24848] "Fraction; a small part or item forming a piece of a whole."
[24849] "Frequency; the number of occurrences within a given time period."
[24850] "From; used to indicate a specified place or time as a starting point."
[24851] "Full; containing as much or as many as is possible or normal."

[24852] "Function; what something is used for."
[24853] "Further; to or at a greater distance in time or space."
[24854] "Gingival; of or relating to the gums."
[24855] "The Gynecologic Oncology Group (GOG) is a non-profit NCI-supported organization."
[24856] "Granulopenic; relating to or resembling granulocytopenia."
[24857] "Grouping; a system for classifying things into groups; the activity of putting."
[24858] "Test for identification of breast cancer patients with tumors that produce exo."
[24859] "Highest; approaching or constituting a maximum."
[24860] "Histologic; of or relating to histology."
[24861] "Histologically; involving the use of histology or histological techniques."
[24862] "Hormonal; relating to hormones."
[24863] "In modern usage, an hour is defined as a unit of time 60 minutes, or 3600 seconds."
[24864] "The International Breast Cancer Study Group (IBCSG), created as the 'Ludwig Breast Cancer Study Group'."
[24865] "Immature; in an early period of life or development or growth."
[24866] "Inclusion; the state of being included."
[24867] "Increase; a process of becoming larger or more numerous or more important."
[24868] "The quality of being hard, the process of hardening, or an abnormally hard spot."
[24869] "Inflammatory; relating to inflammation."
[24870] "Initial; occurring at the beginning."
[24871] "Initials; the first letter of a word, especially a person's name."
[24872] "Intake; the substances, or the quantities thereof, taken in and utilized by the body."
[24873] "Intensity is a measure of the time averaged energy flux. To calculate the intensity of a beam of light, multiply the power by the area and divide by the time interval."
[24874] "Interlobar; between lobes."
[24875] "International; concerning or belonging to two or more nations."
[24876] "Interruption; a time interval during which there is a temporary cessation of something."
[24877] "A period of time between two events or occurrences. (from the American Heritage Dictionary)"
[24878] "Into; expressing entrance, or a passing from the outside of a thing to its interior."
[24879] "Intraclavicular; within the clavicles."
[24880] "Invaded; penetrated or assaulted, in a harmful or injurious way."
[24881] "Involved; connected by participation or association or use."
[24882] "Involvement; a connection by participation or association or use."
[24883] "Isolated; marked by separation of or from usually contiguous elements."
[24884] "Largest; greatest in size of those under consideration."
[24885] "Last; coming after all others in time or space or degree or being the only one of its kind."
[24886] "Lead; be in charge of."
[24887] NA
[24888] "Level; a position on a scale of intensity or amount or quality."
[24889] "The bottom of the normal range for a particular laboratory result."
[24890] "Lobar; of or relating to or affecting a lobe."
[24891] "Lobular; of or relating to or resembling a lobule."
[24892] "Longest; having the greater length of two or the greatest length of several."
[24893] "Loss; a gradual decline in amount or activity."

[24894] "Lost; parted with; no longer held or possessed."
[24895] "Lymphovascular; of or relating to the lymphatic vessels."
[24896] "Main; most important; principal."
[24897] "Margin; the boundary line or the area immediately inside the boundary."
[24898] "Maximum; the largest possible quantity or degree."
[24899] "Mesorectal; of or relating to the fold of peritoneum, or mesentery, attached to the rectum."
[24900] "Metaplastic; pertaining to or characterized by metaplasia."
[24901] NA
[24902] "Microinvasive; exhibiting or pertaining to microinvasion, the microscopic extension of a tumor beyond the basement membrane."
[24903] "Middle; an area that is approximately central within some larger region."
[24904] "Minimum; the smallest possible quantity."
[24905] "Mode; a particular functioning condition or arrangement."
[24906] "Modification; the act of making something different."
[24907] "Modified; changed in form or character."
[24908] "Molecular; relating to or produced by or consisting of molecules."
[24909] "Mononuclear; possessing a single nucleus."
[24910] "Monophasic; occurring in or characterised by only one phase or stage."
[24911] "Most Recent; nearest to the present."
[24912] "Myocardial; of or pertaining to the myocardium."
[24913] "Myometrial; of or pertaining to the myometrium."
[24914] "One criteria of the TMN staging system. N refers to the extent of lymph node involvement."
[24915] "The North Central Cancer Treatment Group (NCCTG) is a national clinical research organization."
[24916] "The National Cancer Institute of Canada acts in concert with its partner the Canadian Cancer Society."
[24917] "Nearest; most near in time or space."
[24918] "Nervous; of or relating to the nervous system."
[24919] "The cell of a pigmented cutaneous nevus that differs from a normal melanocyte in that it is larger and has a more rounded nucleus."
[24920] "New; having no previous example or precedent or parallel."
[24921] "Newly Diagnosed; very recently determined."
[24922] "Not cancerous."
[24923] "Non-Measurable; not possible to be measured."
[24924] "Non-Protocol; treatment not specified in a protocol."
[24925] "Non-Surgical; not pertaining to or amenable to surgery."
[24926] "Non-Target; other than the one for which something is done."
[24927] "Non-Visceral; not relating to or affecting the viscera."
[24928] "Not; used for negation of a word or group of words."
[24929] "The numerical result of analysis of a breast cancer based on the Nottingham Prognostic Index."
[24930] "The nursing of an infant at the mother's breast."
[24931] "Nutritional; of or relating to or providing nutrition."
[24932] "Observation; watching something and taking note of what happens."
[24933] "Observed; discovered or determined by scientific observation."
[24934] "Occupational; of or relating to the activity or business for which a person is employed."
[24935] "Off-Treatment; the phase of a protocol during which a patient does not receive the study treatment."

[24936] "Opposite; being directly across from each other."
[24937] "Optional; possible but not necessary; left to personal choice."
[24938] "Original; preceding all others in time or being as first made or performed."
[24939] "Overall; including everything."
[24940] "A term used to describe cancer that can be felt by touch, usually present in 1
[24941] "Regions near to the parametrium."
[24942] "Participating; taking part in an activity."
[24943] "Past; before the present time."
[24944] "Pathologic; caused by or altered by or manifesting disease or pathology."
[24945] "Pectoral; of or pertaining to the chest."
[24946] "Penetration; the act of entering into or through something."
[24947] "Percentage; a fraction or ratio with 100 understood as the denominator."
[24948] "Surrounding the colon."
[24949] "(pear-ih-NOOR-al) Around a nerve or group of nerves."
[24950] "Period; an amount of time."
[24951] "Surrounding the prostate."
[24952] "Of or pertaining to the body."
[24953] "Planned; devised, contrived, or formed in design."
[24954] "Platinum-Based; derived from or containing platinum."
[24955] "Any system designed to expedite the sorting and delivery of mail by assigning
[24956] "Denoting the back surface of the body; at or near the hind end in quadrupeds o
[24957] "Post-Operative; relating to or occurring during the period immediately followi
[24958] "(pre-KAN-ser-us) A term used to describe a condition that may (or is likely to
[24959] "The act or process of preparing."
[24960] "Present; the period of time that is happening now."
[24961] "Occurring prior to something else."
[24962] "First or foremost in importance."
[24963] "Earlier in time or order."
[24964] "the act of moving forward toward a goal."
[24965] "Projected; calculated, estimated, or predicted based on present data or trends
[24966] "An area which is governed as part of a country or an empire. (from Cambridge I
[24967] "Proximity; the property of being close together."
[24968] "Reason or intention."
[24969] "Qualifying; success in satisfying a test or requirement."
[24970] "Rate; a magnitude or frequency relative to a time unit."
[24971] "Reaction; a bodily process occurring due to the effect of some foregoing stimu
[24972] "An explanation of the cause of some phenomenon or action."
[24973] "Received; taken, gotten, or acquired."
[24974] "Reduced; made less in size or amount or degree."
[24975] "Reference; a short note acknowledging a source of information or quoting a pas
[24976] "Referring; sending or directing for treatment, information, or a decision."
[24977] "In oncology, describes the body area right around a tumor."

[24978] "Registered; listed or recorded officially."
[24979] "Registering; the act of listing or recording officially."
[24980] "Registration; the act of enrolling."
[24981] "Regular; conforming to a standard or pattern."
[24982] "Related; connected or associated."
[24983] "Remaining; enduring or persisting."
[24984] "Removed; taken out of or separated from."
[24985] "Reporting; the act of providing a short account."
[24986] "Required; necessary, not optional."
[24987] "(ree-SEK-tuh-bull) Part or all of an organ that can be removed with surgery."
[24988] "Resected; having been removed by surgery."
[24989] "Resolution; something settled or resolved; the outcome of decision making."
[24990] "Respiratory; pertaining to respiration."
[24991] "Responsible Person; a person worthy of responsibility or trust or one held acc
[24992] "Restart; take up or begin anew."
[24993] "Retrieval; the operation of accessing information from storage."
[24994] "Retrotracheal; denoting the area behind the trachea."
[24995] "Reviewing; reexamining or reconsidering."
[24996] "Sampling; the selection or making of a sample."
[24997] "Satellite; situated near; accompanying."
[24998] "Scale; an ordered reference standard."
[24999] "Scheme; an elaborate and systematic plan of action."
[25000] "Second; coming next after the first in position in space or time or degree or
[25001] "Secondary; of second rank or importance or value; not direct or immediate."
[25002] "A very thin slice (of tissue or mineral or other substance) for examination un
[25003] "Security; freedom from anxiety or fear."
[25004] "Self-Administered; self given or applied."
[25005] "Seminal; pertaining to or containing or consisting of semen."
[25006] "Sent; caused or enabled to go or be conveyed or transmitted."
[25007] "Sequence; serial arrangement in which things follow in logical order or a recu
[25008] "A number of things or events standing or succeeding in order, and connected by
[25009] "Serum Immunologic; refers to immunologic features of or immunologic tests done
[25010] "Severity; used of the degree of something undesirable e.g. pain or weather."
[25011] "Shape; the spatial arrangement of something as distinct from its substance."
[25012] "Signature; your name written in your own handwriting."
[25013] "Signed; having a handwritten signature."
[25014] "Sister; a female sibling."
[25015] "Size; the physical magnitude of something."
[25016] "Slice; a thin flat piece cut off of some object."
[25017] "Source; where something is available."
[25018] "Special; surpassing what is common or usual or expected."
[25019] "Specify; be specific about something; define clearly."

[25020] "Social Security Number; a nine digit taxpayer identification number resembling
[25021] "State; the way something is with respect to its main attributes."
[25022] "Status; a condition or state at a particular time."
[25023] "The process of classifying patients into strata as part of the randomization p
[25024] "Street Address; the street component of an address."
[25025] "Subcarinal; below the carina."
[25026] "Subcategory; a subdivision that has common differentiating characteristics wit
[25027] "Subgroup; a distinct and often subordinate group within a group."
[25028] "Submission; a message submitted for the judgment of others."
[25029] "Submitted; referred for judgment or consideration."
[25030] "Subtype; a group forming a type within a larger type."
[25031] "Sum; the final aggregate amount."
[25032] "Surgical; of or relating to or involving or used in surgery or requiring or am
[25033] "The Southwest Oncology Group (SWOG) is an NCI-sponsored cooperative group, an
[25034] "System; a group of independent but interrelated elements comprising a unified
[25035] "Taken; having accepted for some purpose."
[25036] "Target; the goal intended to be attained."
[25037] "Term; a limited period of time."
[25038] "Text; the words of something written."
[25039] "Treating; providing treatment for."
[25040] "The top of the normal range for a particular laboratory result."
[25041] "Uncoated; not having a coating."
[25042] "Unfiltered; lacking a filter."
[25043] "Unit of Measure; a predetermined quantity (as of length, time, or heat) adopte
[25044] "Update; bring up to date; supply with recent information or technology."
[25045] "Having to do with urine or the organs of the body that produce and get rid of
[25046] "Value; a numerical quantity measured or assigned or computed."
[25047] "Variation; something that deviates from a norm or standard; an instance of cha
[25048] "Version; something a little different from others of the same type; one of a s
[25049] "Vertebral; of or relating to or constituting vertebrae."
[25050] "Visit; the act of going to see some person or place or thing; it can cover a s
[25051] "Vital Status; whether a person is alive or dead (or unknown)."
[25052] "Without; used as a function word to indicate the absence or lack of something
[25053] "Worst; to the highest degree of inferiority or badness; the least favorable ou
[25054] "A system designed to expedite the sorting and delivery of mail by assigning a
[25055] "Refers to cells that develop into connective tissue, blood vessels, and lympho
[25056] "serving to aid or contribute; auxiliary. (Merriam-Webster OnLine)"
[25057] "Dermoid; resembling skin; skinlike."
[25058] "Refers to the area where nerves and blood vessels attach to an organ."
[25059] "Intent; an anticipated outcome that is intended or that guides your planned ac
[25060] "Having to do with the pancreas."
[25061] "One criteria of the TMN staging system. M refers to the presence of metastasi

[25062] "One criteria of the TMN staging system. T refers to the extent of tumor involvement."

[25063] "Following the stated course of action or treatment."

[25064] "Concomitant; following as a consequence."

[25065] "Cribriform; having the appearance of a sieve: containing many perforations."

[25066] "Ductal; related to, or having the quality of, a duct."

[25067] "In a lump; as a whole; used to refer to autopsy techniques in which visceral organs are examined as a whole."

[25068] "Breslow's thickness. maximal thickness of a primary cutaneous melanoma measured in millimeters from the granular layer of the epidermis to the deepest point of invasion of the dermis."

[25069] "breathing in."

[25070] "Fibrinogen; a fibrillar protein present in blood plasma; it converts to fibrin when acted on by the enzyme thrombin."

[25071] "Identified; having the identity known or established."

[25072] "Infarction; localized necrosis resulting from obstruction of the blood supply."

[25073] NA

[25074] "Erection is the hardening, enlarging and rising of the penis which often occurs during sexual intercourse."

[25075] "Physician; a licensed medical practitioner."

[25076] "the state of being pregnant; the period from conception to birth when a woman carries a fetus in the uterus."

[25077] "the discharge of urine."

[25078] "loss of ability to function normally."

[25079] "gradual healing (through rest) after sickness or injury."

[25080] "Measurement of the clearance of endogenous creatinine, used for evaluating the renal function."

[25081] "The capacity of iron-binding protein in serum (transferrin) to bind serum iron."

[25082] "Pulse; the rhythmic contraction and expansion of the arteries with each beat of the heart."

[25083] "a symptom of reduced quality or strength."

[25084] "Bronchoscopist; a doctor or technician who operates a bronchoscope."

[25085] "The diffusion or accumulation in a tissue or cells of substances not normal to that tissue or cells."

[25086] "In medicine, an improvement related to treatment."

[25087] "Movement from one place to another."

[25088] "The formation of a break on the skin or on the surface of an organ. An ulcer is a break in the skin or mucous membrane that is deep enough to expose the underlying tissue."

[25089] "A peptide vaccine consisting of amino acids 12 through 20 of the viral oncoprotein p53."

[25090] NA

[25091] "Agents able to covalently bind to DNA causing inter- or intra-stranded cross-links."

[25092] "Any anatomical feature created by surgery. This includes structures created to replace a missing part or to correct a deformity."

[25093] NA

[25094] NA

[25095] "An acute myeloid leukemia secondary to a myelodysplastic syndrome or therapy-related myeloid leukemia."

[25188] NA

[25189] "Kinase Family Genes encode Kinase enzymes that covalently transfer the terminal phosphate of ATP to a substrate molecule.

[25190] "Serine/Threonine Protein Kinase Genes encode enzymes (Serine/Threonine Protein Kinases) that catalyze the phosphorylation of serine and threonine residues of proteins.

[25191] "Cyclin-Dependent Kinase-Like 2, encoded by the CDKL2 gene, is a member of a large family of cyclin-dependent kinases.

[25192] "Cyclin-Dependent Kinase Inhibitor 2C, encoded by the CDKN2C gene, is a member of the cyclin-dependent kinase inhibitor family.

[25193] "Cyclin-Dependent Kinase Inhibitor 3, encoded by the CDKN3 gene, is a dual-specificity protein phosphatase.

[25194] "Dual-specificity protein phosphatases are a subclass of protein tyrosine phosphatases that can also dephosphorylate serine and threonine residues.

[25195] "Surface Glycoprotein, Ig Superfamily Member, encoded by the human CDON gene, is a member of the immunoglobulin superfamily.

[25196] "Cerebellar-Degeneration-Related Antigen 1, encoded by the human CDR1 gene, is a member of the immunoglobulin superfamily.

[25197] "All homeodomain proteins contain the homeodomain, a region of structural similarity that is characteristic of the homeobox gene family.

[25198] "Caudal Type Homeo Box Transcription Factor 2, encoded by the human CDX2 gene, is a member of the homeobox gene family.

[25199] "Members of the CEA Family Gene encode the members of the CEA Family Protein, which is a family of cell adhesion molecules.

[25200] "Members of the CEA family consist of a single N domain, with structural similarity to the immunoglobulin superfamily.

[25201] "N Domain is one of the seven predicted immunoglobulin-like domains that members of the CEA family possess.

[25202] "Carcinoembryonic Antigen-Related Cell Adhesion Molecule 7, encoded by the human CEACAM7 gene, is a member of the immunoglobulin superfamily.

[25203] "Cadherin EGF LAG Seven-Pass G-Type Receptor 1, encoded by the human CELSR1 gene, is a member of the cadherin superfamily.

[25204] "Serotonin 5-HT-3 Receptor, encoded by the human HTR3 gene, is one of the seven members of the 5-HT receptor family.

[25205] "The HTR3 gene at 11q23.1-q23.2 encodes Serotonin 5-HT-3 Receptor, one of the seven members of the 5-HT receptor family.

[25206] NA

[25207] "CHK1 Checkpoint Homolog, encoded by the human CHEK1 gene, is a serine/threonine kinase that plays a role in DNA damage checkpoint control.

[25208] "Choline Kinase, encoded by the human CHK gene, produces phosphocholine from choline and ATP.

[25209] "Cholinergic Receptor, Muscarinic 4, encoded by the human CHRM4 gene, is a G protein-coupled receptor.

[25210] "Generally speaking, this term describes an experimental format in which probes are attached to a solid support.

[25211] NA

[25212] "Investigator; a scientist who devotes himself to doing research; a researcher who is engaged in scientific research.

[25213] "The double membrane structure surrounding the mitochondrion and separating it from the cytoplasm is called the mitochondrial membrane.

[25214] "The nuclear envelope has two membranes, each with a typical unit membrane in structure and composition.

[25215] "Oxidoreductase Genes encode the class of enzymes that catalyze oxidation/reduction reactions.

[25216] "The nuclear envelope has two membranes, each with the typical unit membrane structure and composition.

[25217] "Isomerase Genes encode enzymes (Isomerases) that catalyze spatial or structural isomerization reactions.

[25218] "Polymerase Genes encode enzymes (Polymerases) that catalyze polymerization reactions.

[25219] "Ligase Genes encode Ligases, a large major class of enzymes that catalyze the joining of two molecules.

[25220] "This protein is a member of the cytochrome P450 superfamily of enzymes. The cytochrome P450 superfamily is a large family of heme-containing enzymes.

[25221] "A salt that is comprised of a hydrogen and chloride ion that can be linked to a nucleic acid.

[25222] "An organic salt or ester of maleic acid that could be conjugated to free base nucleic acids.

[25223] "Esterase Genes encode Esterases that catalyze hydrolysis of ester bonds to produce alcohols and carboxylic acids.

[25224] "Ribonuclease Genes encode (Ribo)nucleases that specifically catalyze the cleavage of RNA.

[25225] "Endoribonuclease Genes encode hydrolytic Endoribonucleases that hydrolyse internal phosphodiester bonds in RNA.

[25226] "Human RNase III Gene at 5p13.3 encodes 2 alternative isoforms of ubiquitous 13S ribonuclease III.

[25227] "The human DICER1 gene at 14q32.2 encodes Endoribonuclease Dicer. This protein is involved in the processing of double-stranded RNA into small interfering RNA.

[25228] NA

[25229] "The Double-Stranded RNA Binding Domain is found in a variety of RNA-binding proteins and is involved in the processing of double-stranded RNA.

[25393] "Encoded by human GLMN Gene, two alternative isoforms of ubiquitous monomeric G

[25394] "Expressed in testis, thymus, and lymphoblasts by human FANCG Gene, 622-aa 68.5

[25395] "Encoded by human EXTL1 Gene (EXT Family), 676-aa 75-kDa Exostosin-Like 1 is a

[25396] "Ubiquitously expressed by human EXTL2 Gene (EXT Family), 330-aa 37.5-kDa Exost

[25397] "Ubiquitously expressed by human EXTL3 Gene (EXT Family), 919-aa 105-kDa Exosto

[25398] "The protein encoded by this gene is a member of the STAT family of transcription factors.
[25399] NA
[25400] "This protein is a member of the BAG1-related protein family. BAG1 is an anti-apoptotic protein.
[25401] NA
[25402] "Deltex Homolog 1, encoded by the human DTX1 gene, is a transcription corepressor.
[25403] "Encoded by human BAG5 Gene (BAG1 Family), 447-aa 52-kD BCL2-associated Athanogonin.
[25404] "BAI1 is a a seven-span transmembrane protein and is postulated to be a member of the BAI family.
[25405] "Expressed in glia and neurons by human FGF9 Gene (FGF family), 208-aa 23-kDa (FGF family).
[25406] "Genes that encode the class of enzymes that catalyze the transfer of glycosyl groups from one molecule to another.
[25407] "Endothelial Cell Growth Factor 1 (Platelet-Derived), encoded by the human ECGF gene.
[25408] "B-Cell Lymphoma 6 Protein is a zinc finger transcription factor containing an Ets domain.
[25409] NA
[25410] "Endothelin-2, encoded by the human EDN2 gene, is a macrophage chemoattractant.
[25411] "The gene was identified by its translocation in a case of mucosa-associated lymphoid neoplasia.
[25412] "Epidermal Growth Factor-Like Protein 6, encoded by the human EGFL6 gene, is a member of the EGF family.
[25413] "ETS Homologous Factor, encoded by the human EHF gene, is a protein that belongs to the ETS family.
[25414] "EphA2 is overexpressed in many cancers, including 40% of breast cancers. EphA2 is a member of the Eph family.
[25415] "Elastin Microfibril Interface Located Protein, encoded by the human EMILIN gene.
[25416] NA
[25417] "Eph-related receptor tyrosine kinase A4. Seems to have a function in axon guidance.
[25418] "This protein functions as a receptor for ephrin A2, A3 and A5 and plays a role in cell migration.
[25419] NA
[25420] "Eph-related receptor tyrosine kinase B1; may have a role in neurogenesis (Protocadherin family).
[25421] "Frizzled 2, encoded by the human FZD2 gene, is a 7-transmembrane domain protein.
[25422] NA
[25423] "Frizzled 3, encoded by the human FZD3 gene, is a G protein-coupled receptor for Wnt3.
[25424] "Eph-related receptor tyrosine kinase B2; may have a role in neurogenesis (Protocadherin family).
[25425] "Frizzled 4, encoded by the human FZD4 gene, is a G protein-coupled receptor for Wnt4.
[25426] "Eph-related receptor tyrosine kinase B3; may have a role in cell migration in the nervous system.
[25427] "Implies movement of a population of cells from one place to another as in the case of metastasis.
[25428] "A class of agents used in prophylactic or curative therapy to attenuate the neovascularization of tumors.
[25429] "Epiregulin is a member of the epidermal growth factor family. Epiregulin can function as a ligand for EGF receptors.
[25430] "Frizzled 7, encoded by the human FZD7 gene, is a G protein-coupled receptor for Wnt7.
[25431] "Ets2 repressor factor, a transcriptional repressor; suppresses ets-induced transcription.
[25432] NA
[25433] "ERBB2 interacting protein; acts as an adaptor for the receptor ERBB2/HER2, which is a member of the EGF family.
[25434] "DNA-binding protein of the ETS family; contains a DNA binding domain (LocusControl Region).
[25435] "Member of the ets DNA binding protein family; may bind the adenovirus E1A enhancer.
[25436] "Epidermal growth factor receptor pathway substrate 8; has a role in normal and tumorigenic cell growth.
[25437] "Epidermal growth factor receptor pathway substrate 15; has a role in normal and tumorigenic cell growth.
[25438] "Frizzled 6, encoded by the human FZD6 gene, is a G protein-coupled receptor for Wnt6.
[25439] "Gastric inhibitory polypeptide (glucose-dependent insulinotropic polypeptide)

[25440] "G Protein-Coupled Receptor Kinase-Interactor 1: GIT1 is a multidomain protein

[28286] NA
[28287] "A synthetic antibody targeted against a cell surface glycoprotein (gp74) on a
[28288] NA
[28289] "An immunotoxin consisting of the murine anti-CD19 monoclonal antibody HD37 con
[28290] "An idiotypic determinant of a monoclonal antibody directed against antigens pr
[28291] "An anti-carcinoembryonic antigen (anti-CEA) murine monoclonal immunoglobulin G
[28292] "A recombinant murine monoclonal antibody directed against a human class II mol
[28293] "A synthetic immunotoxin consisting of the murine monoclonal antibody N901 conj
[28294] NA
[28295] "A recombinant monoclonal antibody (OVB3) directed against human ovarian cancer

[28296] "A murine monoclonal antibody directed against the human epidermal growth factor receptor-1 (HER-1/EGFR).
[28297] NA
[28298] "A chimeric antigen receptor gene derived from the murine monoclonal antibody M14.
[28299] NA
[28300] NA
[28301] "A murine monoclonal antibody directed against human colorectal carcinoma-associated antigen 125.
[28302] NA
[28303] "An alkaline earth metal, Magnesium is important for many biochemical functions.
[28304] "Magnesium Chloride was used as a laxative. An alkaline earth metal, magnesium.
[28305] "Well absorbed into the bloodstream, Magnesium Citrate is used as a laxative or antacid.
[28306] NA
[28307] "A nonsteroidal anti-inflammatory drug (NSAID) belonging to the salicylate family.
[28308] NA
[28309] "A contrast medium based on diatrizoic acid or amidotrizoic acid solutions. Mebex.
[28310] NA
[28311] "An agent derived from sulfasalazine, an antiinflammatory agent. Mesalamine mesalazine.

[28938] "Encoded by S100 Family Gene members, S100 Calcium Binding Proteins, localized

[28939] "Encoded by human S100A11 Gene (S100 Family), 105-aa 12-kDa homodimeric S100 Ca

[28940] "Expressed in monocytes and lymphocytes by human S100A12 Gene (S100 Family), 91

[28941] "Constitutively expressed in epithelial cells and in macrophages during chronic

[28942] "Constitutively expressed in epithelial cells and in macrophages within inflame

[28943] "Encoded by human S100P Gene (S100 Family), 95-aa 10-kDa S100 Calcium Binding P

[28944] "Expressed in lung, skeletal muscle, kidney, peripheral leukocytes, spleen, bra

[28945] "Encoded by human SCTR Gene (GPCR2 Family), 440-aa 50-kDa (precursor) 7 transme

[28946] "Widely expressed (highest in myeloid leukocytes) by human SECTM1 Gene, 248-aa

[28947] "Ethnicity is the cultural characteristics that connect a particular group or g

[28948] "MRSI. A noninvasive imaging method that provides information about cellular a

[28949] "Encoded by human SEMA3E Gene (Semaphorin Family), 775-aa 89-kDa (precursor) se

[28950] "Proteinase Inhibitor Genes encode Proteinase Inhibitor Proteins that block the

[28951] "Expressed in pancreas and adipose tissues by human SERPINI2 Gene (PAI-1 Serpin

[28952] "Enzyme Inhibitor Genes encode Enzyme Inhibitor Proteins, biological molecules

[28953] "Expressed by human SET Gene (NAP Family) in all tissues and responsive to seru

[28954] "Widely expressed (high in testis) by human SETDB1 Gene (Suvar3-9 Family) as 2

[28955] "Encoded by human SFRP4 Gene (SFRP Family), Secreted Frizzled-Related Protein 4

[28956] "Encoded by human SH2B Gene, SH2-B Homolog is similar to rat (FceRI gamma-chain

[28957] "Expressed in placenta, pancreas, kidney, lung, fetal kidney, and fetal lung by

[28958] "Expressed in a variety of tissues by human SH2D3C Gene, 698-aa SH2 Domain Cont

[28959] "A recombinant vaccinia virus encoding prostate-specific antigen (PSA). Vaccin

[28960] "Widely expressed as 3 isoforms, p66SHC, p52SHC and p46SHC, by human SHC1 Gene,

[28961] NA

[28962] "The ACTG2 gene encodes Actin, Gamma 2, which is a smooth muscle actin found in

[28963] "The COL1A1 gene encodes Collagen I (Alpha 1), which is the major component of

[28964] "The COL1A2 gene encodes Collagen I (Alpha 2), one of the chains for type I col

[28965] "The DHPS gene encodes Deoxyhypusine Synthase. The unusual amino acid hypusine

[28966] "The EIF4EL3 Gene encodes eukaryotic translation initiation factor 4E-like 3, w

[28967] "The HLA-DPB1 gene encodes Major Histocompatibility Complex, Class II, DP Beta

[28968] "The HNRPAB gene encodes Heterogeneous Nuclear Ribonucleoprotein A/B, which belongs to the heterogeneous nuclear ribonucleoprotein (hnRNP) family.

[28969] "The human LMNB1 gene encodes Lamin B1, one of the two B type proteins. Lamins are members of the intermediate filament protein family.

[28970] "The human MT3 gene encodes Metallothionein 3, which belongs to family 1 of the metallothionein family.

[28971] "The human MYH11 gene encodes Smooth Muscle Myosin Heavy Chain 11, which belongs to the myosin heavy chain family.

[28972] "The MYLK gene encodes Myosin Light Polypeptide Kinase, which is a calcium/calmodulin-dependent protein kinase.

[28973] "The NR4A1 gene encodes Nuclear Receptor Subfamily 4, Group A, Member 1, which belongs to the nuclear receptor superfamily.

[28974] "The SNRPF gene encodes Small Nuclear Ribonucleoprotein Polypeptide F, which belongs to the small nuclear ribonucleoprotein (snRNP) family.

[28975] "Expressed in the brain by human SHC3 Gene, the 474-aa 52-kD and 594-aa 64-kD isoforms.

[28976] "Expressed only during embryogenesis by human SHH Gene (Hedgehog Family), 462-aa.

[28977] NA

[28978] NA

[28979] NA

[28980] NA

[28981] NA

[28982] NA

[28983] "Expressed as 2 alternative isoforms in monocytes and dendritic cells by human SKIL Gene.

[28984] "SKI-Like Protein SKIL is widely expressed by human SKIL Gene with immediate early response properties.

[28985] "Encoded by human SKIV2L Gene (SKI2 Helicase Family), 1246-aa 138-kDa Helicase.

[28986] "Expressed by human SKP2 Gene (F-Box Family) as 3 alternative isoforms, alpha (1), beta (2), and gamma (3).

[28987] NA

[28988] NA

[28989] "A cancer vaccine comprised of a recombinant fowlpox virus vector encoding the SKIL protein.

[28990] "A recombinant vaccinia virus that encodes granulocyte-macrophage colony stimulating factor (GM-CSF).

[28991] "Encoded by human SLC26A3 Gene (SLC26A/SulP Transporter Family), 764-aa 85-kDa.

[28992] "Broadly expressed (highest in liver, pancreas, prostate, ovary, and brain) by human SLC26A3 Gene.

[28993] "Encoded by human SLPI Gene, 132-aa 14-kDa (precursor) Secretory Leukocyte Protease Inhibitor.

[28994] "Encoded by human SMO Gene (FZ/SMO GPCR Family), 787-aa 86-kDa (precursor) Smoothened.

[28995] "ZEVALIN (Ibritumomab Tiuxetan) is the immunoconjugate resulting from a stable conjugation of the anti-CD20 antibody Ibritumomab with the cytotoxic radionuclide ⁹⁰Yttrium.

[28996] "A cancer vaccine consisting of ALVAC, a highly attenuated poxvirus strain derived from the vaccinia virus.

[28997] NA

[28998] NA

[28999] "An aqueous therapeutic analogue of the endogenous cytokine interleukin-1-beta.

[29000] "A glycoprotein cytokine produced by the human leukemia T-cell line Jurkat. As a member of the interleukin-1 family, it is involved in the regulation of the immune response.

[29001] NA

[29002] NA

[29003] NA

[29004] "A recombinant monoclonal antibody directed against colon cancer (CC) epitopes, specifically targeting the CEB1 gene product.

[29005] "Ubiquitously expressed by human SNK Gene (CDC5/Polo Ser/Thr Kinase Family), 68-kDa.

[29006] "Cyclin-E Binding Protein 1, encoded by the CEB1 gene, specifically interacts with the E2F transcription factor.

[29007] "Encoded by human SNW1 Gene (SNW Family), 536-aa 61.5-kDa nuclear coactivator for the E2F transcription factor.

[29008] "Expressed by human SRP19 Gene (SRP19 Family), 144-aa cytoplasmic Signal Recognition Particle.

[29009] "Human Sushi-Repeat Protein is encoded by SRPUL Gene. (NCI)"

[29010] "Encoded by human SSH3BP1 Gene, Spectrin SH3 Domain Binding Protein 1 contains
[29011] "Expressed in a variety of tissues (muscle highest) by human SSPN Gene, integrin
[29012] "Encoded by human candidate tumor suppressor gene ST13 Gene, cytoplasmic 369-aa
[29013] "A vaccine composed of two synthetic peptides derived from beta-human chorionic
[29014] "Link Guanine Nucleotide Exchange Factor II, encoded by the Link-GEFII gene, is
[29015] "BCSC-1, encoded by the LOH11CR2A gene, is a predicted 438-amino acid protein.
[29016] "Widely expressed as different isoforms in nonepithelial tissues (heart, skeletal
[29017] "Expressed in most tissues (ovary, prostate, heart, kidney, and thyroid highest
[29018] "Widely expressed in muscle and heart (strongest), pancreas, kidney, spleen, pr
[29019] "Expressed in testis, skeletal muscle, thymus, and spleen by human STK6 Gene (A
[29020] "Encoded by human SUI1 Gene (SUI1 Family), 113-aa 12.7-kDa Protein Translation
[29021] "A U.S. State is any one of the fifty states which is a member of the federatio

[31024] "Encoded by human MLLT6 Gene, 1093-aa 112-kDa AF-17 Protein has high similarity
[31025] "Expressed in heart, brain, placenta, lung, liver, skeletal muscle, kidney, and

[31026] "Expressed in a variety of tissues (abundantly in erythroid stem cells to differ

[31027] NA

[31028] "Widely expressed (highest in heart, placenta, kidney, and pancreas) by human M

[31029] NA

[31030] "Virosomes are reconstituted influenza virus (A/Singapore) envelopes. The membr

[31031] "Encoded by IL9-induced, but not IL2 or IL4, human MRAS Gene (Ras GTPase Family)

[31032] "Expressed in many tissues by human MTCP1 Gene (TCL1 Family) as short 68-aa 8-k

[31033] "Widely expressed as a 4.5-kb transcript by human MYBBP1A Gene, 1328-aa 149-kDa

[31034] NA

[31035] NA

[31036] "Expressed in most nonlymphoid tissues including prostate, lung, liver, and col

[31037] "A 1352-aa 153-kDa and a 2371-aa 268-kDa isoform of Neuroblastoma-Amplified Pro

[31038] "Encoded by human NCK2 Gene, ubiquitous 380-aa 43-kDa cytoplasmic NCK Adaptor P

[31039] "Expressed in fetal brain, lung, liver, and kidney by human NCYM Gene, 109-aa 1

[31040] "Expressed most prominently in placenta, prostate, kidney, small intestine, and

[31041] NA

[31042] "Expressed in brain by human NEURL Gene, 574-aa 62-kDa Neuralized-like Protein

[31043] NA

[31044] NA

[31045] "Expressed in fetal liver by human NKX2H Gene (NK2 Homeobox Family), 239-aa 26-

[31046] "Expressed in a largely prostate-specific and androgen-regulated manner by huma

[31047] "Expressed in melanocytes, kidney, placenta, spleen, liver, prostate, and gut b

[31048] NA

[31049] "Expressed throughout the enteric and central nervous systems by human NMU Gene

[31050] "Expressed in adult/fetal tissues by human NOTCH1 Gene (Notch Family), 2556-aa

[31051] "Expressed in brain by human NOVA2 Gene, RNA-binding NOVA2 protein is recognize

[31052] "Expressed in heart and vasculature by human NPR2 Gene (Guanylyl Cyclase Family)

[31053] "Broadly expressed by human NR1 Gene (FNR Family), 597-aa 67-kDa cytoplasmic NA

[31054] "Expressed by human NRBP Gene, ubiquitous 535-aa 60-kDa Nuclear Receptor Bindin

[31055] "Encoded by human NRP1 Gene (Neuropilin Family), Neuropilin 1 contains 1 MAM, 2

[31056] "Widely expressed in adult tissues (highest in heart, small intestine, colon, l

[31057] "Widely expressed (mainly neural tissue) by human NTRK2 Gene (IR Tyr Kinase Fam

[31058] "Widely expressed (mainly nervous tissue) by human NTRK3 Gene (IR Tyr Kinase Fa

[31059] "Encoded by human NUMA1 Gene, Nuclear Mitotic Apparatus Protein 1 is a structur

[31060] "Expressed in thymus, spleen, bone marrow, kidney, brain, and testis by human N

[31061] "A covalent conjugate of recombinant interferon alfa, subtype 2a, and polyethyl

[31062] "Expressed in various myeloid cells, brain, and lung by human MATK Gene (CSK Fa

[31063] NA

[31064] NA

[31065] "Widely expressed by human MKNK1 Gene (Ser/Thr Kinase Family), alternative 465-

[31066] "Expressed in melanocytes and retina by human MLANA Gene, 118-aa 13-kDa Pro-ric

[31067] "Expressed in most adult tissues, including hematopoietic cells, except liver b

[31068] "Encoded by human MPP2 Gene (MAGUK Family), 576-aa 65-kDa Palmitoylated Membran

[31069] "Encoded by human MPP3 Gene (MAGUK Family), 585-aa 66-kDa Palmitoylated Membran

[31070] "Widely expressed by human NCOA5 Gene, 579-aa 66-kDa Nuclear Receptor Coactivat

[31071] "Encoded by human NCOA6 Gene, ubiquitous 2063-aa 250-kDa mono-/homodimeric Nucl

[31072] "Widely expressed human NEO1 Gene (Ig/DCC Family) encodes alternative 1461-aa 6

[31073] "Expressed in small intestine, spleen, liver, heart, adrenal gland, and pancrea

[31074] "Widely expressed human NRCAM Gene (L1/Neurofascin/NgCAM Family) encodes altern

[31075] "Expressed in brain and peripheral tissues, human NTF3 Gene (NGF-Beta Family) e

[31076] NA

[31077] NA

[31078] NA

[31079] NA

[31080] NA

[31081] NA

[31082] NA

[31083] "Encoded by human OR1G1 Gene (GPCR1 Family), 313-aa 35-kDa integral membrane pr

[31084] "Expressed by G1 cyclin-dependent kinase activated human ORC1L Gene (ORC1 Famil

[31085] NA

[31086] NA

[31087] "Expression (testes highest) not regulated during cell proliferation, human ORC

[31088] "Human ORC3L Gene (ORC3 Family) encodes 711-aa 82-kDa nuclear Origin Recognitic

[31089] "Human ORC4L Gene (ORC4 Family) encodes 436-aa 50-kDa nuclear Origin Recognitic

[31090] "Abundantly expressed in spleen, ovary, testes, colon mucosa, and prostate, hum

[31091] "Expressed throughout the cell cycle, human ORC6L Gene (ORC6 Family) encodes nu

[31092] "Encoded by human OSMR Gene, 111-kDa 979-aa Oncostatin-M Specific Receptor Beta

[31093] "Ubiquitously expressed (highest in pancreas, lowest in liver) by human OS4 Gen

[31094] NA

[31095] NA

[31096] NA

[31097] "Expressed ubiquitously (high in brain) by human PIP5K2A Gene (PtdIns(4)P-5-Kin

[31098] "Abundantly expressed (6.3-kb mRNA) in many tissues, human PIP5K2B Gene (PtdIns

[31099] "Expressed in activated, but not resting, macrophages and in placenta, prostate

```

```
Slot "delim":
```

```
[1] "\\|"
```

```
Slot "rootToken":
```

```
[1] "root_node"
```

There are helper functions that navigate the ontology; at present a true graph is not employed.

```
> mpar <- parents("Mesna", GDI_NCIThesaurus)
```

```
> mpar
```

```
[1] "Uroprotective_Agent"
```

```
> children(mpar, GDI_NCIThesaurus)
```

```
[1] "Mesna"    "Dimesna"
```

General regular expression matching can be used:

```
> substring(grep("HER-2", GDI_NCIThesaurus), 1, 70)

C2215
"HER-2_neu_Intracellular_Domain_Peptide_Vaccine"
C2537
"HER-2_neu_Peptide_Vaccine"
C2593
"HER-2_neu_Intracellular_Domain_Protein"
C2637
"MVF-HER-2_628-647-CRL_1005_Vaccine"
C2658
"Anti-CD3_x_anti-HER-2-neu_Bispecific_Monoclonal_Antibody"
C11686
"HER-2-neu-Peptide-Vaccine_Montanide-ISA-51"
C11702
"HER-2-Neu-Peptide-Vaccine_Sargramostim"
C12095
"Anti-CD3-x-Anti-HER-2-neu-BiSpecific-Monoclonal-Antibody_Autologous-Ly"
```

When definitions are present, they can be obtained:

```
> getDefs("Mesna", GDI_NCIThesaurus)

[1] "2-mercaptoethanesulfonic acid sodium salt; scavenges glutathione; used as a detoxi"
```

3 Building a new ontology

A workflow for building a new ontology is not clearly established at present, but the basic tasks appear to be

1. determine a set of concepts and associated terms;
2. examine existing ontologies for coverage of the terms of interest;
3. if the application can proceed on the basis of the harvesting of a single pre-existing ontology, it may suffice to build a *taggedHierNomenclature* instance based on this ontology;
4. if the application requires a separate ontology or desired concepts are not adequately covered,
 - (a) construct a new OWL model for the ontology using Protege;

- (b) deserialize the OWL to an *ontModel* using Rswub;
- (c) create a *taggedHierNomenclature* instance on the basis of lists derivable from the *ontModel* instance.

We'll illustrate this process using some terms related to breast cancer identified by Sridhar. We'll work backwards from a data structure, `SGDIvocab`, currently in *ontoTools*. Sridhar looked the terms up in the NCI Metathesaurus and determined that they were covered in some sense, but he did not provide the exact entry matching the intended concept. The terms are

```
[1] "Epithelial_gene_cluster" "ER_Clinical"
[3] "ER"                      "ESR1_Array"
[5] "Differentiation"         "Erb-B2_Clinical"
[7] "PR"                      "HER-2"
[9] "Erb-B2_Array"
```

The exact meanings of these terms is not completely clear. The use of the `_array` suffix has no conventional interpretation that I am aware of; likewise the `_clinical` suffix. We may need to invent new terms and definitions to clarify the intended meaning of these tokens.

We proceed provisionally; the resulting tools may be modified at any time in the future as usage patterns emerge.

3.1 Protege-based management of terms and structure

Figure 1 shows the Protege ontology editor in use to define the `BCTerms` class. There are 13 instances. Note to the right of the display that there are a variety of fields to be defined, including an RDFS comment field, and an `NCI_Meta_tag` field. Figure 2 shows the editor focused on the formal tags provided by NCI Metathesaurus for terms semantically similar (by informal matching) to the `BCTerms` of interest.

3.2 Importation of OWL model

The Rswub package is still not ready for distribution, but I will convert OWL to R structures as needed. The ontology model is prescribed by the Jena system from HP. `readSWModel` returns an anonymous omegahat reference to a Java class instance.

```
> library(Rswub)

> omod <- readSWModel("http://www.biostat.harvard.edu/~carey/SGDI.owl",
+   asURL = TRUE)

> omod
```

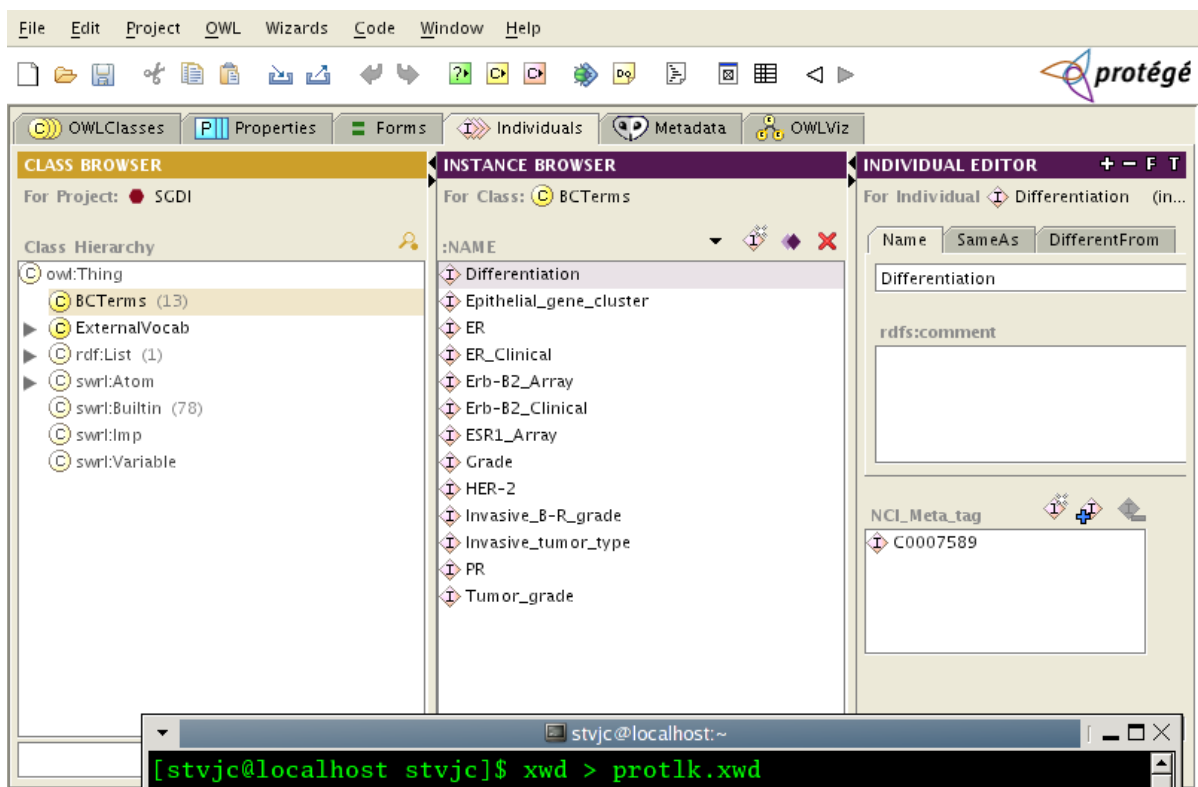

Figure 1: View of protege ontology editor for SGDI vocabulary. Focus on BCTerms.

Figure 2: View of protege ontology editor for SGDI vocabulary. Focus on NCI metatags.

```
Ontology model (instance of com.hp.hpl.jena.ontology.impl.OntModelImpl )
source: http://www.biostat.harvard.edu/~carey/SGDI.owl
```

There are 4 named classes.

```
Base namespace: http://www.owl-ontologies.com/unnamed.owl .
```

The Java-based ontology model object here is completely independent of the tagged hierarchical nomenclature structures which are implemented purely in R. For our purposes, the `omod` object is just a bridge from OWL to R. `omod` can be interrogated for the underlying RDF model. This is just a set of triples (subject, predicate, object), and `getSplits` returns a list of two elements: `bypred` and `bysub`.

```
> somod <- getSplits(omod)
> names(somod)
```

We have defined `NCI_Meta_tag` as a property with domain `BCTerms` and range `NCI_Meta_Termset`.

```
> somod$bysub$NCI_Meta_tag
```

The value of the property for each `BCTerm` instance is:

```
> somod$bypred$NCI_Meta_tag
```

This table is the basis of the tagged nomenclature that we need in the SGDI ontology. The “subj” values are the tokens we are interested in. The “obj” values are the formal identifiers of the NCI Metathesaurus entries that we want to map our tokens to. When `CACore` is working, we will use these formal identifiers to retrieve detailed definitions, focused keyword matches, etc.

3.3 The nomenclature

```
> data(SGDIvocab)
> SGDIvocab
```

4 Summary and future work

We have defined a few classes representing nomenclatures and hierarchical nomenclatures. Populating instances of these classes with existing genomic information was illustrated with KEGG and NCI Thesaurus (not metathesaurus!). Search and navigation of these structures is supported, but additional facilities will be required as the workflow clarifies.

When a specific collection of clinical and technical terms is identified, we propose to formally manage the collection using Protege to define an OWL/RDF model. The model can be deserialized to Java and R structures using Rswub, which will be placed in Bioc development in the near future.

The OWL/RDF model has a regimented graphical structure. It is a collection of linked ordered triples with interpretation (subject, predicate, object). When OWL objectProperty status is conferred on an entity (property term), a domain and range can be defined for that property. A benefit of formal specification of domain and range is that misuse of the property can be programmatically forbidden. In our example, the `NCI_Meta_tag` property maps from the `BCTerms` set to an instance of the `NCI_Meta_termset`. If we ask for the `NCI_Meta_tag` property of any `BCTerm` instance, we are guaranteed to receive an instance of `NCI_Meta_termset`. An instance of the `NCI_Meta_termset` is composed of a formal NCI Metathesaurus alphanumeric tag, and a brief verbal definition. Ultimately the tag will be used in programmatic interrogation of the metathesaurus for ancillary information such as detailed definition, links to defining and illustrative documents, and so forth.

Use of the OWL technology conveys access to techniques for vocabulary harmonization. Schemas may be defined that establish equivalent properties with different names, or set-theoretically defined combinations of formal classes, and models may be revised using formal inference based on the schema. Logical inference within the OWL model is also supported.
