

Package ‘affydata’

October 16, 2021

Version 1.40.0

Date 2011-10

Title Affymetrix Data for Demonstration Purpose

Author Laurent Gautier <laurent@cbs.dtu.dk>

Maintainer Harris Jaffee <hj@jhu.edu>

Depends R (>= 2.4.0), affy (>= 1.23.4)

Imports methods

Suggests hgu95av2cdf, hgu133acdf

Description Example datasets of a slightly large size. They represent 'real world examples', unlike the artificial examples included in the package affy.

License GPL (>= 2)

R topics documented:

Dilution	1
Index	3

Dilution	<i>AffyBatch instance Dilution</i>
----------	------------------------------------

Description

This [AffyBatch-class](#) object represents part of a dilution experiment dataset.

Usage

```
data(Dilution)
```

Format

An `AffyBatch-class` object containing 4 arrays.

Source

Two sources of cRNA A (human liver tissue) and B (Central Nervous System cell line) have been hybridized to human array (HGU95A) in a range of proportions and dilutions. This data set is taken from arrays hybridized to source A at 10.0 and 20 μ g. We have two replicate arrays for each generated cRNA. Three scanners have been used in this study. Each array replicate was processed in a different scanner.
