## Package 'ObMiTi'

April 1, 2025

Type Package Title Ob/ob Mice Data on Normal and High Fat Diet Version 1.14.0 Year 2021 Description The package provide RNA-seq count for 2 strains of mus musclus; Wild type and Ob/Ob. Each strain was divided into two groups, and each group received either chow diet or high fat diet. RNA expression was measured after 20 weeks in 7 tissues. #### ObMiTi

#### Description

Title: Ob/ob Mice Data on Normal and High Fat Diet The package provide RNA-seq count for 2 strains of mus musclus; Wild type and Ob/Ob. Each strain was divided into two groups, and each group received either chow diet or high fat diet. RNA expression was measured after 12 weeks in 7 tissues.

#### Details

The dataset can be accessed through the ExperimentHub as a RangedSummarizedExperiment object contains:

assay The read counts matrix.

colData The phenotype data of the samples

rowRanges The feature data and annotation of the peaks.

**metadata** extra details about the sample and associated phenotype studies. This is a data.frame of bibliography information of the studies from which the samples were collected for.

### Examples

```
# load the data object
library(ExperimentHub)
# query package resources on ExperimentHub
eh <- ExperimentHub()
query(eh, "ObMiTi")
```

```
# load data from ExperimentHub
ob_counts <- query(eh, "ObMiTi")[[1]]</pre>
```

# print object
ob\_counts
